

UNIVERSITY STATEMENT

19 May 2020

Dear staff and students

The DUT COVID-19 Task Team would like to notify you about the official COVID-19 screening application.

All staff and students are required to be screened before entering campus. Please take note of details below.

Action required preferably before you enter DUT

- Access the Mobenzi DUT Covid-19 self-screening web page

Here is the link to the WebApp:

<https://covid-19.mobenzi.com/6cbeeg>

This form MUST be completed by ALL people entering DUT, including employees, students, visitors and contractors. It will not be used to discriminate against you in any way. All information is confidential and will only be sent to the DUT workplace clinic or the person designated by DUT. The information will be stored on servers designated by DUT.

We appeal to you to please copy and save the link. Since the app is not a download, it will barely use any data. We urge you to respond honestly to the few questions and to do so every day before entering campus. This confidential data is a critical part of the DUT COVID-19 Risk Mitigation Plan, to safeguard the health of all DUT members.

Your health has an impact on everyone's health.

Everyone's health has an impact on your health.

Action required if you don't download the App before you enter DUT:

1. If you don't download the app and fill in the details, you will be required to fill in a hard copy document at the gate before you enter DUT.

Or you may be required to use the link and capture the information in real-time. This will cause a fair amount of delay to yourself and other staff. We regret that this is non-negotiable.

2. If you have challenges accessing the app link due to data or device challenges.

Please do bring your own pen if you feel your health may be compromised.

We will provide sanitized pens. However, please expect delays.

- i. Due to data challenges (for whatever reason):

You could proceed to DUT and use DUT's WIFI to access the weblink and then, respond to the questions. Since you will not be allowed to enter the security gates, you will need to "find" a secure spot outside campus to perform the download. You may then enter DUT. If not, you will have to undertake option I.

- ii. If you have device failure:

Please report this fact and you will regrettably have to fill in the hardcopy document. Ultimately this is about the health of the entire DUT community.

COVID-19 Is a highly contagious disease. Infection rates are still increasing and we all have the responsibility to combat the spread of the virus. Please be responsible and assist us with the screening procedure.

Sincerely

DUT COVID-19 TASK TEAM
