

ADVANCED DIPLOMA BUSINESS INTELLIGENCE

Closing date for applications:
19 December 2025

Minimum Requirements:

Diploma in Information and Communications Technology at NQF level 6, or a university qualification at NQF level 6 in a cognate field.

Programme Description/Caption :

This qualification is designed to equip graduates with advanced knowledge and practical skills in business intelligence (BI), data science and analytics. The programme prepares students to interpret and analyze large datasets, extract actionable insights, and drive data-informed decision-making to add value within business environments. Graduates are prepared for diverse roles, including Data Scientist, Data Analyst, BI Developer/Manager, Business Reporting, Data Warehouse Developer, Marketing Database Analyst, and Manager of Business Units. The qualification enables vertical progression to higher-levels studies in business intelligence and analytics.
