

MASTER OF INTERNET OF THINGS (MIoT)

Closing date for applications:
19 December 2025

Minimum Requirements:

A NQF Level 8 qualification in Information and Communication Technology, Computer Science, Electronic or Computer Engineering, or a related cognate field.

Programme Description/Caption :

This qualification is a strategic postgraduate qualification aimed at developing specialised expertise in IoT systems — a key technological area of the Fourth Industrial Revolution.

It equips graduates with both technical and managerial skills to design, develop, and manage IoT solutions while engaging in independent research under expert supervision.

The qualification prepares students for leadership roles in academia, research, and industry, contributing to innovation, economic growth, and digital transformation.
