BACKGROUND

1.1 PROCUREMENT BACKGROUND:

The Maintenance Building located at Block M on the ground floor of the Steve Biko Campus has experienced ongoing roof and ceiling deterioration due to ageing infrastructure and repeated water ingress. Over time, the roof covering has developed leaks caused by worn waterproofing, damaged roof sheets, and compromised flashing. As a result, rainwater has been penetrating the building during adverse weather conditions.

This persistent water intrusion has led to visible damage within the interior ceiling structure. Ceiling boards have become stained, warped, and weakened, while certain sections show signs of sagging and moisture absorption. The damp conditions have also contributed to mould growth and pose safety concerns for staff working in the affected areas.

The deterioration of both the roof and ceiling has now reached a point where repair work is essential to restore the building's integrity, prevent further structural damage, and ensure a safe working environment. Immediate attention is required to avoid escalation of the problem, which may result in higher repair costs and disruptions to maintenance operations.

The proposed repair project aims to address the root causes of the leaks by restoring waterproofing, replacing damaged roof components, and rehabilitating all affected ceiling areas. These repairs will improve safety, extend the building's lifespan, and create a functional and secure workspace for the Maintenance Department.

1.2 DUT FOOTPRINT:

DUT consists of five (5) campuses and residences situated in Durban and two(2) campuses in Pietermaritzburg. There are high-rise buildings with the total size of circa 273,887 square meters over an area of circa 62.28 hectares.

The SUPPLIER shall, immediately upon receipt of such notification, arrange for the SUPPLIES to be removed and until the time of their removal, the SUPPLIES shall be held at the risk and expense of the SUPPLIER. The SUPPLIER shall, immediately upon receipt of such notification, also refund all payments made by the UNIVERSITY for those SUPPLIES together with interest thereon at the prime overdraft rate, charged by the UNIVERSITY'S bankers from time to time, from the date of receipt of such notification to the date of payment.

9.8 Where goods are being sold by mass or measure, same shall be supplied by nett mass and/or metric measure.

10.1.5 if the SUPPLIER changes the identity of its owner;

10.1.6 if the SUPPLIER disposes of any of its assets other than in the ordinary course of its business.

10.2 If it appears to the PROCUREMENT DIVISION that the SUPPLIER is not executing the contract in accordance with the true intent and meaning thereof or that it is refusing or delaying to execute the contract or that it is not carrying on the contract at such rate of progress as to ensure DELIVERY within the STIPULATED DELIVERY PERIOD, then in any of such events the PROCUREMENT DIVISION may give written notice to the SUPPLIER of the cause of complaint. Should the SUPPLIER fail, within a reasonable time stipulated in the notice, to satisfy the PROCUREMENT DIVISION, in its reasonable discretion, that the contract is being and will be properly executed as agreed and/or that DELIVERY will be made within the STIPULATED DELIVERY PERIOD, then the UNIVERSITY shall have the right forthwith to cancel this contract.

10.3 Any cancellation by the UNIVERSITY, whether in whole or in part, shall be without prejudice to any accrued claims against the SUPPLIER and claims which the UNIVERSITY may have for damages arising out of such cancellation. The SUPPLIER shall have no claim whatsoever against the UNIVERSITY after the contract has been cancelled.
