KEY: Assessment: CA = Continuous Assessment is no Final examination for these subjects/modules.
Numbers 1 to 3 indicates the year of study, “a”= Semester 1, “b”= Semester 2 (eg 2b=Second year, Semester 2)
* Approved by Senate wef 2015/08
# These subjects are final level subjects.
A Pre-Req (prerequisite) means this subject must be passed prior to registration for the subsequent subject/module.

4.2 PROGRAMME INFORMATION
This information must be read in conjunction with the programme rules that follow.

4.2.1 Academic Integrity
Refer to the DUT General Rules pertaining to academic integrity G13 (1) (o) - covering falsification of academic records, plagiarism and cheating. These will be enforced wherever necessary to safeguard the worthiness of our qualifications, and the integrity of the Faculty of Applied Sciences at DUT.

4.2.2 Code of Conduct for Students
A professional code of conduct pertaining to behaviour, appearance, personal hygiene and dress shall apply to all students registered with the Faculty of Applied Sciences, at all times. Refer to Programme Rule 4.3.8 below.
4.2.3 **Attendance**
Students are expected to achieve 100% attendance for all planned academic activities as these are designed to provide optimal support for the required competency. Students are expected to be punctual for all academic activities. Attendance at all visits to industry is compulsory. Attendance during Experiential Learning placements is determined by the employment requirements of the employer. Penalties may be invoked for late attendance. Refer to Programme Rule 4.3.9 below.

4.2.4 **Work Integrated Learning (WIL)**
The WIL component of this programme is compulsory. The student is required to secure and undertake experiential training in the workplace. Placements do not need to be completed in a single period - it is recommended that WIL is split across the total 3 years of study. Designing a WIL schedule should be done in consultation with the programme WIL coordinator.
The department undertakes to assist the student to obtain suitable placement by providing the student with contact details and employment seeking skills. It is then the responsibility of the student to find a placement to demonstrate their work seeking ability. The department will assist further in extreme cases.
Refer to Programme Rule 4.3.7 below.

4.2.5 **Assessment and Moderation**
Students are expected to work steadily through the period of registration in order to achieve the highest results possible.
- All modules/subjects in this programme are assessed using 100% coursework. These are called continuous assessment subjects and as such have no final examination/s nor supplementary examination/s opportunities. Opportunities for reassessment are provided for students who fail written assessments. These are stipulated in the relevant study guides.
- Assessment details are listed under each subject at the back of this handbook.
- Assessments could include a variety of testing methods including, but not limited to, written tests, oral presentations, theoretical and/or practical assessments, group work and assignments.
- Assignments must be handed personally to the lecturer who will record their receipt. Late submission will be penalised.
- Moderation follows the DUT Assessment Policy stipulations.
Refer to Programme Rule 4.3.9 below.

4.2.6 **Employment Opportunities**
There are job opportunities in the apparel and other related industries for graduates in management, product development, production, work study, planning, quality, garment technology and other areas. Employment in South Africa is available in four main industrial areas - formal manufacturers (established apparel manufacturers), informal sector (small to micro enterprises and entrepreneurs), retail (centralized buying and store management), and allied industries (footwear, training, selling equipment and computers). Opportunities also exist for self-employment. Graduates can pursue further qualifications in management, entrepreneurship, retail, quality or education.
4.2.7 Registration Periods
Annual registration will occur in January with further modules added in July where appropriate. Some modules (full-time or part-time) may be offered in both semesters where resources permit.

4.2.8 Modules in Clothing Management
Certain subjects for the Clothing Management programmes have been split into two modules, which are offered in successive semesters. Module details are included in the relevant subject study guides. All modules are split vertically, i.e., half of the learning material for all components of the whole syllabus is covered in each module. The learning in the second module is generally dependent on the learning in the first module, although the first module is not a prerequisite of the second, with the exception of Production Technology 1 Module 1 which is a prerequisite for Production Technology 1 Module 2 (Approved by Senate 2015/08).

- This option infers that no formal lectures are attended but tutorials will be available.
- There is no change in the tuition fee.

4.3.5 **Exclusion Rules**  
In addition to DUT Rule G17, a first year student who fails three or more subjects with a final result of less than 40% in each subject is not permitted to reregister in this programme. Deregistration from any subjects is subject to the provision of DUT Rule G6. *(Approved by Senate Rules Comm wef 2014/10)*

4.3.6 **Interruption of Studies**  
In accordance with DUT Rule G21A(b), the minimum duration for this programme will be 3 years of registered study and the maximum duration will be 5 years of registered study, including any periods of WIL. Should a student interrupt their studies by more than three (3) years, the student will need to apply to the department for permission to reregister and will need to prove currency of appropriate knowledge prior to being given permission to continue with registration. *(Approved by Senate Rules Comm wef 2014/10)*

B. TEXTILE TECHNOLOGY

7. Diploma in Textile Technology (DITXT1)
Dip (Textile Technology) (SAQA Reg No: 98918, SAQA Credit Value 360 credits)

Purpose of Qualification
The three year qualification in Textile Technology is designed to prepare individuals for a wide range of specialist career opportunities in the industrial manufacture of textile fibres, yarns, and fabrics, as well as the colouration and finishing thereof. This is based on a foundation in mathematics, chemistry and physics.

Students specialise in either the ‘wet’ or the ‘dry’ side of the industry. The dry side includes a broad range of manufacturing routes including the cultivation/manufacture of the main fibre types, the principle yarn manufacturing processes, and the knitting, non-woven, and woven fabric manufacturing routes. On the ‘wet’ side - areas include the chemistry and processing associated with the principle dyeing, printing, and finishing stages of manufacture, as well as colour physics and polymer chemistry. In addition, this qualification includes other important areas such as textile testing, product development, and some management content.

The program is designed to prepare students with a broad range of textile knowledge, to provide entrance into the extremely diverse local textile manufacturing operations. Graduates of the diploma would be able to display technical qualities appropriate to the manufacturing environment and demonstrate environmental responsibilities.

### 7.2 Programme Information

#### 7.2.1 Academic Integrity (Programme Information)

Refer to the DUT General Rules pertaining to academic integrity DUT Rule G13 (1) (o) - covering falsification of academic records, plagiarism and cheating. These will be enforced wherever necessary to safeguard the worthiness of our qualifications, and the integrity of the Faculty of Applied Sciences at DUT.
7.2.2 Assessment and Moderation (Programme Information)
- Assignments must be submitted by due date indicated in the relevant study guide. Late submission will be penalised.
- In the case of a continuous assessment subject (a subject which has no final examination/s or supplementary examination/s) opportunities for reassessment are provided for students who fail assessments. These are stipulated in the relevant study guide.
- Moderation follows the DUT Assessment Policy stipulations. Refer to Programme Rule below.

7.2.3 Registration Periods (Programme Information)
- All applicants must apply through the Central Applications Office (CAO) by no later than October prior to the year of intended study.
- First time registration will occur in January and for returning students January and July. Not all subjects or modules will be offered in both semesters.

7.3 Programme Rules
7.3.1 Minimum Admission Requirements (Programme Rules)
In addition to DUT Rule G7, the following minimum entrance requirements and the selection criteria outlined in Departmental Rule 7.3.2 apply for applicants with reference to:-

7.3.1.1 Academic Achievement (Programme Rules)
In line with the above, applicants’ school leaving academic achievement must comply with one of the following:-
- i) a National Senior Certificate (NSC) with endorsement for diploma/degree entry with the following subjects at the stated minimum ratings
- ii) a Senior Certificate is matriculation exemption with the following subjects at the stated minimum ratings
- iii) a National Certificate (Vocational) Level 4 with statutory requirements for a diploma entrance and the following subjects at the stated minimum ratings

* The sum of an applicant’s achievement rating for Mathematics + Physical Science must be ≥7 to be eligible for the three year Diploma in Textile Technology.
** Either Mathematics or Physical Science should be at HG E (or SG D) to be eligible for the 3 year Diploma in Textile Technology

7.3.1.2 Admission Requirements based on Work Experience, Age and Maturity; and Recognition of Prior Learning (Programme Rules)
The DUT Rules G7 (3), and G7 (8) respectively, will apply.

7.3.1.3 Admission of International Students (Programme Rules)
• The DUT’s Admissions Policy for International Students and DUT Rules G4 and G7 (5) will apply.
• International students must meet the equivalent of programme minimum entrance requirements as stated above.

7.3.1.4 Admission of Students from other Institutions (Programme Rules)
In addition to the relevant DUT Rules a transferring student will only be accepted if there are places available and the student has met the applicable entrance requirements of the University.

7.3.2 Selection Criteria (Programme Rules)
In addition to the Minimum Admission Requirements, the following process will determine placement in the programme:
• Initial shortlisting for selection is based on the applicant’s academic performance in Grade 12 (Grade 11 or Grade 12 trial marks will be used for current matriculants).
• Applicants who meet the above criteria will be invited to undergo placement testing to stream into either the mainstream programme or ECP.
• Provisional acceptance is given to selected applicants awaiting National Senior Certificate (NSC) results. If the final Grade 12 NSC results do not meet the minimum entrance requirements, this provisional acceptance will be withdrawn.
• Final selection will be based on the ranking of applicants who meet the minimum requirements, as well as available places (refer to DUT Rule G5).

7.3.3 Pass Requirements (Programme Rules)
The DUT Rules G12, G14 and G15 apply.

7.3.4 Promotion to a Higher Level/ Progression Rules (Previously Reregistration Rules) (Programme Rules)
The DUT Rule G16, and all prerequisite subjects as identified in the Table 7.1 Programme Structure, applies.
In order to progress from Semester 3 (2nd year 1st semester) to Semester 4 (2nd year 2nd semester), a student would need to accumulate a minimum number of 60 credits at NQF level 6 (out of the 100 available at this point).

7.3.5 Exclusion Rules (Programme Rules)
In addition to DUT Rule G17, a first semester student who fails three or more subjects with a final result of less than 40% in each subject is not permitted to reregister in this programme. Deregistration from any subjects is subject to the provision of DUT Rule G6.

7.3.6 Interruption of Studies (Programme Rules)
In accordance with DUT Rule G21A(b), the minimum duration for this programme will be 3 years of registered study and the maximum duration will be 5 years of registered study. Should a student interrupt their studies by more than 3 years, the student will need to apply to the department for permission to re-register and will need to prove currency of appropriate knowledge prior to being given permission to continue with registration.

7.3.7 Attendance and Assessment (Programme Rules)

7.3.7.1 A student who, for any valid reason (Refer to Programme Rule 7.3.7.2), is absent from a particular practical or test, must provide written proof of the reason for the absence to the lecturer concerned, within five (5) working days of returning to the institution in order to be considered for a special assessment.

8.2 PROGRAMME INFORMATION
This information must be read in conjunction with the programme rules that follow.

8.2.1 Academic Integrity
Refer to the DUT General Rules pertaining to academic integrity G13 (1) (o) - covering falsification of academic records, plagiarism and cheating. These will be enforced wherever necessary to safeguard the worthiness of our qualifications, and the integrity of the Faculty of Applied Sciences at DUT.

8.2.2 Code of Conduct for Students
A professional code of conduct pertaining to behaviour, appearance, personal hygiene and dress shall apply to all students registered with the Faculty of Applied Sciences, at all times. Refer to Programme Rule 9.3.8 below.

8.2.3 Attendance
Students are expected to achieve 100% attendance for all planned academic activities as these are designed to provide optimal support for the required competency. Students are expected to be punctual for all academic activities. Attendance at all visits to industry is compulsory. Attendance during Experiential Learning placements is determined by the employment requirements of the employer. Penalties may be invoked for late attendance. Refer to Programme Rule 9.3.9 below.

8.2.4 Work Integrated Learning (WIL)
The compulsory WIL component of this programme comprises a total of two semesters of WIL, during which the student is required to secure and undertake experiential training in the workplace. The preferred timing of the first period of placement is between Semester 2 and Semester 3, and the second placement would be after Semester 4 of study (Refer to Table 9.1). The timing of these placements is however flexible and subject to discussion with the Head of Department.
The department undertakes to assist the student to obtain suitable placement by providing the student with contact details and employment seeking skills. It is then the responsibility of the student to find a placement to demonstrate their work seeking ability. The department will assist further in extreme cases. Refer to Programme Rule 9.3.7 below.

8.2.5 Assessment and Moderation
Students are expected to work steadily through the period of registration in order to achieve the highest results possible.

6.3.6.1 Assessment details are listed under each subject at the back of this handbook.
6.3.6.2 Assessments could include a variety of testing methods including, but not limited to, written tests, oral tests, theoretical and/or practical examinations, group work and assignments.
6.3.6.3 Assignments must be handed personally to the lecturer who will record their receipt. Late submission will be penalised.
6.3.6.4 In the case of a continuous assessment subject (a subject which has no final examination/s or supplementary examination/s) opportunities for reassessment are provided for students who fail assessments. These are stipulated in the relevant study guide.
6.3.6.5 Moderation follows the DUT Assessment Policy stipulations. Refer to Programme Rule 9.3.9 below.

8.2.6 Employment Opportunities
The majority of Textile Technologists are employed by the local textile manufacturing industry, typically in the production and quality areas. Careers typically fall into either the DRY (mechanically related formation of yarns and fabrics) part of production, or the
WET (chemical colouration and finishing) sides of textile manufacture. Other career opportunities include retail buying and downstream processors of a wide variety of textile products - from the major apparel and household fabric retail houses, through to the vast diversity of technical textile users - such as the motor industry, construction and mining, medical textiles, and other areas.

8.2.7 Registration Periods
Registration will occur in both January and July. Work done during the semester will be assessed at the end of each semester. Not all subjects or modules (Full-time or Part-time) will be offered in both semesters.

8.2.8 Short Courses
The following short course is offered on behalf of SADFA by Textile Technology:

testing, product development, and some management content. As well as the colouration and finishing thereof. This is based on a foundation in mathematics, chemistry and physics. Students specialise in either the 'wet' or the 'dry' side of the industry. The dry side includes a broad range of manufacturing routes including the cultivation/ manufacture of the main fibre types, the principle yarn manufacturing processes, and the knitting, non-woven, and woven fabric manufacturing routes. On the 'wet' side areas include the chemistry and processing associated with the principle dyeing, printing, and finishing stages of manufacture, as well as colour physics and polymer chemistry. In addition, this qualification includes other important areas - such as textile testing, product development, and some management content. The program is designed to prepare students with a broad range of textile knowledge, to provide entrance into the extremely diverse local textile manufacturing operations. This qualification is offered through a three year programme (refer to item 4 above), or through an augmented curriculum - offered over a minimum of four years of study which is devised to enhance student development and to improve the student’s chances of successful completion.

9. NATIONAL DIPLOMA: TEXTILE TECHNOLOGY (EXTENDED CURRICULUM) (NDTTFI)

Purpose of Qualification
The qualification in Textile Technology is designed to prepare individuals for a wide range of specialist career opportunities in the industrial manufacture of textile fibres, yarns, and fabrics, as well as the colouration and finishing thereof. This is based on a foundation in mathematics, chemistry and physics.
