2019 HANDBOOK
TOWN AND REGIONAL PLANNING
DEPARTMENTAL MISSION
The Department of Town and Regional Planning recognizes the need to effectively respond to the socio-economic transformation challenges facing South Africa. The Department is committed to the principle of autonomy, academic freedom and rejects any form of racism, sexism and/or sectarianism. We are committed to developing a planning profession that is relevant and appropriate to the needs of the community, government, planning institutions and the private sector. The Department therefore aims to offer a service to its students in the following ways:-

• to develop curricula and syllabi which are relevant and appropriate to the needs of the country undergoing socio-economic transformation;
• to reach out to communities where possible, by way of practical projects, and to make this information accessible to interested constituency groups;
• to redress the imbalances of the past especially in respect of race, gender, class and any other form of social imbalance, through appropriate equity policies;
• to develop and refine technological methodologies relevant to development planning;
• to continuously monitor and evaluate planning, teaching and learning methodologies to ensure effective planning education.
• To actively participate in developing student centered learning pathways throughout their educational experiences and as lifelong learners.

Purpose of the Programmes offered
The discipline of Town and Regional Planning forms part of the built environment profession and provides a significant service element to the construction sector. The profession underpins the development work of local government in South Africa in particular and contributes to housing projects, infrastructural development, township establishment, local economic development, industrial development, environmental considerations, rehabilitation, revitalization and urban renewal, rural development, amongst others, and has local, regional and continental reach.

The qualifications are intended to:

• develop our learners as a “whole”, espousing the ethics and values of the institution, as well as the planning profession, to be a responsible citizen that makes a contribution to the positive development of our society, and has a “world view” that supports lifelong learning;
• achieve a balance between theory and practice;
• provide the relevant career focused training in the field of Town and Regional Planning within the context of the time of the programmes offered, resources and technology, and recognising the developmental context of our society, as well as the cross/ multi-disciplinary nature of our profession.

All the Town and Regional Planning courses offered are registered with The South African Qualification Authority (SAQA). The National Diploma: Town and Regional Planning and Bachelor of Technology: Town and Regional Planning have achieved unconditional accreditation by the South African Council for Planners (SACPLAN) for the period 2014-2018. The new qualification offerings will be accredited once the first cohort of students have completed the qualification.
What is a University of Technology?
A university of technology is characterized by being research informed rather than research driven where the focus is on strategic and applied research that can be translated into professional practice. Furthermore, research output is commercialized thus providing a source of income for the institution. Learning programmes, in which the emphasis on technological capability is as important as cognitive skills, are developed around graduate profiles as defined by industry and the professions.

IMPORTANT NOTICE
The departmental rules in this handbook must be read in conjunction with the University of Technology’s General Rules contained in the current General Handbook for Students.

NOTE TO ALL REGISTERED STUDENTS
Your registration is in accordance with all current rules of the Institution. If, for whatever reason, you do not register consecutively for every year/semester of your programme, your existing registration contract with the Institution will cease. Your re-registration anytime thereafter will be at the discretion of the Institution and, if permitted, will be in accordance with the rules applicable at that time.
1. CONTACT DETAILS

All departmental queries to:

Secretary:  Mrs. V Rabbiechun
Tel No:     031 - 373 2673
Fax No:     031 - 373 2805/0866741456
Location of Department:  Steve Biko Campus, S Block
                        S3 Level 4, Room BS3605.

All Faculty queries to:  Faculty of Engineering and the
Built Environment

Faculty officer:   Ms Neetha Singh

2. STAFFING  Name and Qualification

Head of Department     Ms G Lincoln, MTRP (Natal)
Associate Director     Ms G Lincoln, MTRP (Natal)
Senior Lecturers       Ms N Foster, MTRP (Natal)
                       Ms T Gordon, MTRP (Natal)
                       Dr G G Musvoto, MTRP, PhD Town Planning (UKZN)
                       Pr. Pln A/1829/2014
Lecturers              Ms AJ von Riesen MTRP (Natal)
Junior Lecturer        Mr Sibongiseni Ngubane BTech Town & Regional Planning.
GIS Lab Technician     Mr J Kitching, B Tech TRP (MLST)
Secretary              Mrs V Rabbiechun, ND: Executive Secretary
3. PROGRAMMES OFFERED BY THE DEPARTMENT OF TOWN & REGIONAL PLANNING

South Africa is undergoing democratic transition. This transition has brought to the fore numerous socio-political and economic problems. These problems are characterised by increasing rates of urbanisation, lack of housing, homelessness, growing unemployment, lack of facilities, economic deprivation of sections of our population and many more. It is in this changing environment that the planning profession must carry out its work. This poses enormous problems and places a great deal of responsibility on planning theorists, practitioners and technicians alike. The Durban University of Technology offers a three-year Town & Regional Planning Diploma, a one-year Degree B.Tech: Town & Regional Planning, a new three year Bachelor of the Built Environment in Urban and Regional Planning (as of 2017), and a Master of the Built Environment, that allows students the opportunity to learn technical, creative and relevant skills, which can be applied in a socially responsible way in our changing society.

3.1 Programmes offered

Programmes offered in this Department which, upon successful completion, lead to the award of the following qualifications:

The purpose of the qualifications offered in Town and Regional Planning is to provide professional and technical education leading to a qualification and professional recognition as identified by the Planning Profession Act of 2002.

To achieve this purpose, the Department of Town and Regional Planning provides the opportunity for learners to develop their skills, knowledge and application thereof, within the context of social responsibility and sustainable development through the following broad curricula guidelines:

- the use of social science theory as an analytical framework in which to understand, conceptualise and analyse society, politics, process, the environment and context of development;
- the application of design as a spatial tool for developing human settlement processes, land use and physical development
- economic issues and context as they relate to development
- the environmental and sustainability challenges for planning and society
- the legal framework in which planning functions
- management processes as it relates to the built environment
- ethics and values that underpin the profession
- developing life skills
3.1.1 National Diploma: Town & Regional Planning (Being phased out – in last year of offering of 3rd year only)  
(NDTRP2 / 360 Credits / NQF 6)
The National Diploma: Town & Regional Planning is currently being phased out. The third years comprise full-time study at the Durban University of Technology. The purpose of the National Diploma: Town and Regional Planning qualification as submitted to the South African Qualifications Authority is:
“This qualification is intended for planning technicians working in government and non-government sectors. Learners would in a team be able to perform in both spatial and non-spatial planning fields using appropriate technology in order to critically respond to the challenges in the built environment. Learners may apply for registration as a technician with the SACPLAN (South African Council for Planners).”

3.1.2 Bachelor of Technology: Town & Regional Planning (Being phased out – in last year of offering)  
(BTTRP1/120 Credits/NQF 7)
The B. Tech: Town & Regional Planning comprises a one-year full-time course. The minimum entry requirement is a National Diploma: Town & Regional Planning as laid out in the section 6. and 7. below, in the criteria for admission to the B. Tech: Town & Regional Planning. The purpose of the B.Tech: Town and Regional Planning qualification as submitted to the South African Qualifications Authority is:
“This qualification is intended for persons specializing in the field of urban and regional development planning working in government and non-government sectors. Learners achieving this qualification would independently and in a team, be able to plan in both spatial and non-spatial fields using appropriate technology in order to critically respond to the challenges in the natural and built environment. Learners may apply for registration as a professional planner with the SACPLAN (South African Council for Planners).”

3.1.3 Bachelor Degree of the Built Environment in Urban & Regional Planning  
(BBURP1/ 360 Credits / NQF 7)
The Bachelor of the Built Environment: Urban & Regional Planning comprises a three full-time years of study, with six semesters of modules. The purpose of the degree as submitted to the South African Qualifications Authority is:
“The purpose of this qualification is to develop a graduate that has a good understanding of the field of urban and regional planning and is competent in the knowledge, attitude, insight and skills required for the urban and regional planning profession, in government and non-government sectors. The qualifying graduate will be able to work effectively in a team to competently apply and integrate theoretical principles, evidence-based techniques, practical experience, apply planning procedures and appropriate spatial and non-spatial skills in order to respond to challenges in the built and natural environment. Graduates may apply for registration with the South African Council of Planners (SACPLAN) as identified by the Planning Profession Act of 2002. Graduates achieving this qualification will be competent to work as a Planner, as part of a team, to initiate and manage change in the natural and built environment in order to further human development and sustainability.”
3.1.4 Master Degree of the Built Environment
(MBTRP1 / 180 Credits / NQF 9)
The Masters Built Environment (MBE), by dissertation, is offered by the Department of Town and Regional Planning at the Durban University of Technology. It falls under the MBE programme offered by the Departments of Construction Management & Quantity Surveying which are currently responsible for the registration and administrative support for the qualification. However, the Department of Town and Regional Planning has specific eligibility enrolment criteria and procedures for the programme in line with its departmental strategic research objectives and discipline ethos. These are in line with the envisaged goals and objectives of the programme which are to prepare students for doctoral research as well as equip them with research skills for development planning. The purpose of the Master of the Built Environment is not for the purposes of professional registration with the South African Council for Town and Regional Planners (SACPLAN), but to further research capacity on planning related issues in KwaZulu-Natal.

This qualification is intended for persons who will make a contribution, through research, to understanding the application and evaluation of existing knowledge in a specialized area of urban and regional planning. They will also demonstrate a high level of overall knowledge in that area ranging from fundamental concepts to advanced theoretical or applied knowledge. This is a one-year research degree.

The primary purpose of the Master’s Degree is to educate and train researchers, in a chosen Built Environment field, who can, under minimal guidance, contribute to the development of knowledge at an advanced level.

The research problem, its justification, process and outcome are reported in a dissertation, which complies with the generally accepted norms for research at this level.

3.1.5 Doctor of Philosophy in the Built Environment
(DPBEN1/ 180 Credits / NQF 10)
The primary purpose of the Doctoral Degree is to develop an individual, in a chosen Built Environment field, to be able to contribute independently to the development of significant and original knowledge at an advanced level.

The research problem, its justification, process and outcome are reported in a thesis, which complies with the generally accepted norms for research at this level.

This qualification is intended for persons who will make a contribution, through research, to understanding the application and evaluation of existing knowledge in a specialized area of urban and regional planning.
3.2 Career Information for the Town and Regional Planning Field

The work of a Town & Regional Technician and Planner is of a diverse nature and embraces, inter alia, surveying tasks, planning surveys, the analysis and presentation of data by means of maps, graphs, diagrams and sketches, assistance in the preparation of town planning schemes and the construction of scale models for proposed schemes. There is also an increasing demand for planners to develop and use community participation models and methods in their everyday work and for the management and strategic skills of advanced graduates in the field. Town & Regional Planning Planners are employed by planning firms, local and provincial authorities and civil service, and service organisations.

Graduates of the programme are able to enter the Urban and Regional planning profession and register with the Council as defined by the Planning Profession Act of 2002.

The following are planning and professional organisations that graduates are encouraged to join:

South African Planning Institute (SAPI)
Address: Private Bag X200, Halfway House, 1685
e-mail: sapi@worldonline.co.za
Web: www.sapi.org.za
Tel. No. (011) 805 5947
Fax. No. (011) 805 5971

South African Council for Planners (SACPLAN) Postal Address:
The Registrar
The South African Council For Planners
PO Box 1084
Halfway House
Midrand 1685

Physical Address:
International Business Gateway Office Park
Corner New Road and 6th Street
Midridge Office Park
1st Floor Block G Midridge
Tel: (011) 318-0437 / (011) 318-0460
Fax: (011) 318-0405
Email: planner@sacplan.co.za

Graduates are encouraged to join the Council and Institute, which provide a forum for technicians and planners. During the course of their studies, students will be advised of the activities of the various fraternal planning organizations and how it benefits students and graduates to become members thereof.
3.3 Minimum Admission Requirements

3.3.1 Admission to National Diploma: Town & Regional Planning (NDTRP2)

Admission Requirements
The admission into the National Diploma: Town and Regional Planning requires a national Senior Certificate or recognized equivalent qualification. The qualification is being phased out. Please refer to Rule 5.6.

Duration and Structure of Course
The duration of the course for the National Diploma: Town & Regional Planning is three years. This is based on three one-year levels, i.e. two academic (Years One and Three), and one experiential (Year Two) sandwiched between them. The first and third years comprise full-time study at the Durban University of Technology, while the second year entails working for a firm of Town & Regional Planners or government department whilst completing projects set by the department. The Rules of Progression for the Diploma are set out in Section 5. and 7. below as well as under Section 8. Brief outline of Syllabi.

Work Integrated Learning
The second year of the National Diploma: Town & Regional Planning is devoted to Work Integrated Learning, with students employed by a professional Town & Regional Planning practice, or by a government department, while remaining registered at the Durban University of Technology and having to complete practical projects.

Students will be briefed and set projects and will be required to produce design theoretical technical reports and the like. This will be undertaken within structured syllabi and will be monitored and evaluated by the institution’s lecturers. The syllabi for Year Two are completed mostly in the student’s own time whilst working in an office.

3.3.2 Admission to B-Tech. Town & Regional Planning (BTTRP1)

After completion of the National Diploma: Town & Regional Planning, the student could continue with his/her studies by applying for the B-Tech: Town & Regional Planning.

Admission Requirements
The admission requirements for the B-Tech: Town & Regional Planning is the National Diploma: Town & Regional Planning or equivalent qualification. Criteria for admission to the B-Tech: Town & Regional Planning is set out in 5.4 below.

Duration & Structure of Course
The B-Tech: Town & Regional Planning comprises a one year full-time course.
3.3.3 Admission to Bachelor Degree of the Built Environment in Urban & Regional Planning (BBURP1)

PROGRAMME ADMISSION

Students who wish to enrol for the programme must apply through the Central applications Office (CAO) by end of September of the previous year (See 2.2 below). The number of students enrolled each year will be determined the University enrolment plan and the departmental growth policies. In addition to the minimum University admission requirements, the following criteria must be met by students wishing to study this higher degree.

A. The minimum admission requirements for degree purposes into the Bachelor of the Built Environment in Urban and Regional Planning is a Senior Certificate (SC), National Senior Certificate (NSC) or the National Certificate (Vocational) with appropriate subject combinations and levels of achievement, as defined in the Government Gazette, Vol 751, No 32131 of 11 July 2008, and in the Government Gazette, Vol. 533, No. 32743, November 2009. Alternatively, a Higher Certificate or an Advanced Certificate or Diploma in a cognate field may satisfy the minimum admission requirements.

B. The degree minimum requirements into this programme through the National Senior Certificate are with Mathematics (level 4) and English Home language (level 4) or English First Additional language (Level 5) and two additional twenty credit subjects (excluding another language subject) (level 4) as the compulsory requirements. At least one of these two 20 credit subjects at a minimum level of 4 must come from the following pool of subjects, namely Geography, History, Physical Science or Life Sciences. The latter is taken into account in ranking candidates from highest to lowest score for the available places.

C. The degree minimum requirements into this programme through the National Certificate (Vocational) are with equivalent subject combinations and levels of achievement, in English Home Language 60%, Mathematics 60% and additional three compulsory subjects at 70%. Students will then be ranked, alongside the NSC students, according to their marks for NCV Mathematics and Engineering Science.

D. Applicants may present a cognate National N4 Diploma for entry into the degree program. Credit transfer is not possible. Prospective students, that qualify for degree study at an institution of higher learning, but do not meet the departmental mathematics requirements, may present the following N4 subjects, for consideration for entry to the degree programme, of Mathematics and Engineering Science, with a minimum of 50%. Students will then be ranked, alongside the NSC students, according to their marks for N4 Mathematics and Engineering Science. Mathematics (N4) at a score of 50% is treated as the equivalent of NSC Mathematic with a rating of 4. Physical Science (N4) at a score of 60% is treated as the equivalent of NSC Physical Science with a rating of 5.

** It is required that any one of the additional compulsory subjects is taking from the following pool of subjects (Geography, History, Life Sciences or Physical Science) at a minimum level 4. No equivalent

E. Applicants students will be required to sit for a suitable placement test, as part of the entry requirement to this programme.

F. In addition to the above, the DUT general rules will apply with regard to admission requirements based on work experience, age and maturity, and admission via Recognition of Prior Learning (RPL). The admission of international students will be according to DUT’s Admission’s policy for International Students and General Rules.

**Duration & Structure of Course**
The duration of the programme is 3 years of full-time study. The programme is based on semester modules that are assessed either through continuous evaluation, or examination. The programme is based on core planning modules and general education modules. Students are expected to complete a total of 33 modules for this programme.

**Selection Procedure**
It is the policy of the Durban University of Technology that all persons who apply for study at this Institution shall be subjected to a selection procedure as determined by the Institution from time to time. All first time applicants to the DUT should apply to study at the DUT via the Central Applications Office (CAO).

Contact details:
Phone: (031) 268-4444
Web: www.cao.ac.za
3.4 Master Degree of the Built Environment (MBTRP1)
This qualification is intended for persons who will make a contribution, through research, to understanding the application and evaluation of existing knowledge in a specialized area of urban and regional planning. They will also demonstrate a high level of overall knowledge in that area ranging from fundamental concepts to advanced theoretical or applied knowledge. This is a one year research degree. The G-rules for Masters as contained in Rules G24, G25 and G26 of the General Handbook apply, as does the DUT Postgraduate Student Guide.

Selection Procedure
Application for the Masters programme is open to students who meet the requirements as per the G Rules above. Students are encouraged to contact the Masters Co-ordinator either telephonically (+27 31 3732673) or by email via the Secretary. Prospective students are required to submit a written motivation for undertaking the Masters, and are to submit a 500 word indicative abstract on their intended research area to the Masters Co-ordinator by November for entry for the following year.

Selection of students is made by a panel of senior academic staff, using a ranking system. The ranking system includes the following criteria: relevance of the existing qualification; academic record; professional experience; research proposal; and motivation for admission, and is evaluated using a ranking of: highly relevant, relevant, average, partly relevant and mismatch. Students will be informed of the outcome of their application by the end of January of the following year.

Once selected for the Masters programme, all students will register as per the DUT Postgraduate Student Guide. All students are required to undertake a research methodology module, which includes the refining of the research proposal and acceptance thereof by the Faculty Research Committee before full registration can take place as per the G24 (2) rules.
4. PROGRAMME INFORMATION AND RULES

4.1 General information

1. Suitable Candidate Selection
   A pre-registration system applies for all first time applicants to the Programmes in this Department. All applications must be made via the Central Applications Office (CAO) in the first instance.
   The contact details of the CAO are:
   Telephone: +27 31 268 444
   Web: www.cao.ac.za

2. Selection Criteria
   Demand for the programme generally exceeds the number of placements available. Selection into the programme is based on merit, and a ranking system will apply based on the Entry Requirements outlined in 2.1 above. Successful students are informed of the outcome of their application via changes made on their CAO status, and correspondence from the Department.

3. Registration
   Dates of registration will be according to the University calendar as applicable to higher degree students and Rule G25(2)(c).
   Registration takes place in January of each year. Students registering for the first time at the Durban University of Technology must produce their original Senior Certificate if available, statement of results, Identification document, at registration. If this requirement is not met, the Institution will be forced to cancel enrolment.
   On line web registration is now available to students for subsequent registration periods.

4. Interruption of Studies
   Rule G1(5) applies to registration in an instructional programme. If, for whatever reason, the student does not register consecutively for every year/semester of his/her programme, the existing registration contract with the Institution will cease. Any re-admission will be at the discretion of the Institution and, if permitted, will be in accordance with the rules applicable at the time of re-admission.

5. Tuition & Examination fees
   Tuition fees are available on request from the Student Admission Department. Examination fees are included in the tuition fees. Fees are not refundable. Fees are payable as follows: minimum pre-registration fees on or before the date of registration and the balance in two instalments.

6. Medium of Tuition
   The medium of tuition is English.

7. Hours of Tuition
   Full-time classes officially start at 08h00.
8. **Prescribed Books**
Reference books and technical journals are available to students at the library. Students will be instructed on which books and other equipment to buy.

9. **Bursaries & Loans**
Various scholarships and loans are available. Further information may be obtained from Financial Aid Services.

10. **Residence**
Limited hostel accommodation is available to full-time students. Students can only apply for accommodation once registered as a full-time student. This should be done with Student Administration.

11. **Student Identity Cards**
Students are issued with identity cards at the beginning of their first and subsequent years of study. Presentation of these cards when buying materials, booking for theatres, etc. may mean special discount rates. For security purposes these cards must be presented on demand and must be carried by students at all times whilst on the Institution premises. Lost student cards must be replaced as soon as possible through the Student Admissions Department. Students must present their student cards at exam sittings as proof of Identity and registration.

12. **Student Counselling**
Prospective students and students, who have problems regarding choice of career or subjects, may contact Student Counselling for an appointment.

Contact Ms Naseem Haniff
Tel. (031) 373-2266
E-mail: SCDC@dut.ac.za

13. **International Students**
Durban University of Technology is subject to government policy in respect of the admission of foreign citizens to undergraduate courses. Prospective students should not finalize their study plans before they have obtained the required visa and study permit. Enquiries at Student Admissions should be made in this regard.

4.2 **Rules for Academic Conduct in the Department of Town and Regional Planning**
All students are issued with a Durban University of Technology General Handbook for Students at Registration, available on the student portal. The onus is on the student to familiarize him/herself with these rules. Notwithstanding these rules, the rules for the Department are as follows:

1. **Student Responsibilities**
All students who attend classes must be registered students of the programme. Any student who does not appear on the class registers will not be allowed in the lecture rooms, unless under special circumstances the student has been provided with a letter from the Head of Department, granting the student permission to attend classes.
Attendance registers are taken for all classes, and are used to assist in determining a student’s duly performed (DP) status. Please note that in order to receive a class mark at the end of each semester to allow a student to write the examination, a student is expected to attend lectures, See Rule G12(5) in the DUT General Handbook for students. Late arrivals into lectures are disruptive to the lecturer and students alike. No student will be allowed into the lecture room five (5) minutes after lectures have commenced. All mobile devices are to be switched off during formal lectures.

2. **Course Materials**
   All materials/references/assignments will be issued during formal lectures. A student who does not attend lectures will not receive this information.

3. **Illness**
   A student who is absent from lectures for three (3) consecutive days should produce a doctor’s certificate or other official documentation indicating reasons for non-attendance.

4. **Tests/Assignments**
   If a student is sick on the day of a test or assignment, a doctor’s certificate must be handed in to the lecturer concerned within one (1) week. If there has been a death in the immediate family, the death certificate must be produced within three (3) weeks. Failure to do this will result in the student being allocated 0% mark for said assessment or test.

5. **Exams**
   If a student is sick or there are extenuating circumstances in the student not being able to sit for the final examination, the onus is on the student to advise and apply, with supporting evidence, to the Faculty Office for an aegrotat examination (refer to G12 and G13 examination rules in the General Handbook for Students).

6. **Site visits, field trips, conferences, workshops**
   Site visits, field trips, conferences, workshops and all other external (off Campus) activities are governed by the Rules of Conduct set out in the General Handbook for Students. All students are required to observe the DUT Code of Conduct and Ethics in this regard. No private needs will be permitted whilst on such official DUT business such as for example, dropping off students along the way, transporting visitors or receiving friends etc.

7. **Equipment**
   All students are issued with equipment required to do the programme at the beginning of their first year of study (Engineering Equipment EEQP101). This equipment is considered as the “tools of the trade”. Students will not be permitted in the drawing studios unless they have this equipment.
8. **Student Identification Cards**
   Students’ identification cards must be carried by students at all times, and must be produced by students for examination sittings. If the card is lost, this must be reported to Protection Services. The onus is on the student to apply for a replacement of a Student Identification Card as soon as possible.

9. **Access Disk**
   All level classrooms have 24 hour secure access. Students are issued with access disks at the beginning of each year of study and are required to return them at the end of the respective year of study to the level Coordinator. Should a student misplace a disk, this must be reported to the level Coordinator. The student is liable for the replacement of the disc.

10. **Change of Address**
    Should the student’s address change whilst studying at the Durban University of Technology, the onus is on the student to inform the Faculty Office, and the Secretary of the Department of Town & Regional Planning. This is important as all correspondence from the Institution will be forwarded to the student study address.

11. **Library Orientation**
    It is compulsory for all students to attend library orientation. This will be arranged with your lecturer and the library in due course.

12. **Student Consultation**
    Students wishing to consult with the Head of Department and lecturers must do so according to the open consultation times indicated on the time-table. Should a student be unable to make that time, an appointment must be made through the Secretary of the Department with the lecturer concerned.

13. **Assignments to be handed in to lecturer in class**
    All assignments must be completed by the due dates and handed in during class to the lecturer concerned unless an alternative arrangement has been made by the lecturer. Under no circumstance should any work be handed in to the Secretary.

4.3. **Duly Performed/Course Mark/Examination Mark**
    4.3.1 The final mark shall be made up of the average of assessments, both practical and theoretical, during each module of the programme. There are a combination of final examinations and continuous assessments in the various modules in the programme. The details pertaining to assessment for each module offering are contained in the module Study Guides.

    4.3.2 Duly Performed/Course Mark/Examination Mark
    The minimum Duly Performed (DP) semester mark for examination is 40%. The final mark is made up of 50% Course Mark and 50% Examination Mark, unless otherwise indicated (e.g. continuous assessment).
Classifying Student Performance:
(This refers to the composite evaluation result for each module.)
75% and above: Distinction (Refer rule G15)
50% and above: Pass
45% - 49%: Eligible for re-assessment
44% and less: Fail

4.3.3 Rules G 13 (3) (a) & (b) shall be applied *mutatis mutandis* to students who have missed an examination assessment.

4.4. Academic Irregularities including Plagiarism
Cheating and plagiarism are unaccepted practices that will not be tolerated by the Department and Institution. The Durban University of Technology Rule Book for Students clearly outlines the procedures and actions that will be taken if such breaches occur. Refer to General Rule G13 (o) and (p). The Department keeps a record of all instances of cheating and plagiarism.

It is the responsibility of the student to reference work correctly, to avoid plagiarism and refrain from copying other students’ work or allowing the student’s own work to be copied. Students will be required to submit a standardized signed declaration that they have not plagiarized any work with each document submitted for assessment. Plagiarism occurs where:

- “paragraphs, sentences, a single sentence or significant parts of a sentence which are copied directly and not enclosed in quotation marks or appropriately footnoted; or referenced shortly thereafter;
- direct quotations are not used, but are paraphrased or summarized, and the source of the material is not acknowledged either by footnoting or other simple reference within the text of the paper;
- an idea of the material which appears elsewhere in printed electronic format or on film is used or developed without reference being made to the author or the source of that idea or material and with the intention to deceive.”

*Reference: Faculty of Environmental Sciences, Griffith University School of Environmental Planning: Course Guide 2000, pages 35, 36.*

4.5. Class Representatives
Class representatives are elected for each level of study for a period of one (1) year. Elections will be conducted by the lecturers. Should students be experiencing difficulties, problems or concerns, these must be raised through the class representatives to the lecturer concerned. Should these matters not be dealt with effectively, the student representative must then arrange an appointment with Year co-ordinator, then the Programme Co-ordinator and lastly, with the Head of Department.
### 5. PROGRAMME STRUCTURE NDTRP2 AND BTTRP1

#### 5.1 National Diploma: Town and Regional Planning (NDTRP2)

**NATIONAL DIPLOMA: Town & Regional Planning FIRST YEAR**

5.2. **Re-Registration Rules**

The institutional rules regarding re-registration apply.

**Criteria for Promotion to Higher Levels & Pre-requisites / Rules of Progression**

**National Diploma: Town & Regional Planning**

**From First to Second year**

Students will be allowed to register for the second year of study provided they have passed the following subjects:

- Planning I
- Drawing I
- Planning Design II
- Survey & Analysis I
- Computer Skills I

Students may carry any two of the following subjects into third year; namely, Geography, Civil Engineering and Surveying.

**From Second to Third Year**

Students will be allowed to register for the third year of study provided:
- they have successfully completed their second year of study;
- do not carry more than two subjects from the first year;
- completed the mandatory twelve months experiential training of the 2nd year

To enrol for the third year students will be allowed to carry a maximum of two subjects provided they are not prerequisites for any of the third level subjects.

**B. Tech: Town & Regional Planning**

A student will only be allowed to enrol for the B.Tech. if the student has passed all first, second and third year subjects of the National Diploma: Town & Regional Planning and subject to the criteria laid out below.

5.3. **B. Tech. Town & Regional Planning (BTTRP1)**

After completion of the National Diploma: Town & Regional Planning, a student could continue with his/her studies by applying for the B-Tech: Town & Regional Planning.

**B.TECH: TOWN AND REGIONAL PLANNING (NQF 7)**

5.4. **Criteria for Admission to the B.Tech: Town & Regional Planning**  
**National Diploma: Town & Regional Planning (New Course)**  
The minimum requirement for admission to the B-Tech. Town & Regional Planning is a National Diploma: Town & Regional Planning. Prospective students are required to have performed at an appropriate level as determined by the Department.

**National Diploma: Town & Regional Planning (Old Course)**  
A student who is in possession of the National Diploma: Town & Regional Planning (T3) would only be eligible to enrol for the B-Tech. subject to completing a bridging module.

This module will comprise the following subjects taken from the new diploma:  
Planning Design III  
Development Planning III  
Legal Procedures II  
Computer Applications III  
A student should have a minimum of 5 years relevant practical post diploma experience.  
A working knowledge of CAD is a pre-requisite for entry at this level.

**National Higher Diploma: Town & Regional Planning (Old Course)**  
A student who is in possession of a National Higher Diploma: Town & Regional Planning (T4) would be eligible to enrol for the B-Tech. subject to the following:  
A working knowledge of CAD is a pre-requisite for entry at this level.  
**OR**  
A student should have a minimum of 4 years relevant practical post-diploma experience.

In all cases above it is the prerogative of the Department to call prospective students for an interview.

**Exclusion Rules**  
The institutional rules regarding academic exclusion apply.

---

5.5. **Subject Content**  
**NB:** Students to read this section in conjunction with the relevant learner guides.

**Brief Outline of Syllabi**

**NATIONAL DIPLOMA: TOWN & REGIONAL PLANNING**  
**First Year Subjects**  
**Communication Skills (Continuous Assessment)**  
Recommended lecture periods 2 per week (1 Theory and 1 Tutorial)  
1. Communication theory  
2. Oral communication skills  
3. Group communication skills  
4. Technical writing  
5. Applied technical writing  
6. Interpersonal skills
Computer Skills I (Continuous Assessment)
Recommended lecture periods 3 per week (1 Theory and 2 Practicals)
1. The basic components and operation of a micro-computer
2. Software: Operating system, word processing, use of spreadsheet and introduction to computer aided drawing.
   Note: In order to proceed to second year, the student must pass this subject.

Drawing I (Continuous Assessment)
Recommended lecture periods 6 per week (+ 1 Tutorial)
1. Drawing paper: their different properties and uses.
2. Drawing equipment: their care and applications.
   Line work: construction lines, detail lines and final lines.
   Annotations: printing and stencilling.
   Scales: presenting reality on paper, enlarging and reducing plans.
3. Base plan compilation and town planning layouts and models.
   Note: In order to proceed to Planning Design II students first need to pass this subject in the first semester.

Geography I (Examination)
Recommended lecture periods 5 Theory per week
1. Ecology, hydrology, geomorphology,
2. Oceanography, climatology,
3. Urban Geography, Sustainability: soil conditions
4. Spatial representation / geo-visualization

Planning I (Examination)
Recommended lecture periods 5 Theory per week
1. Historical evolution of towns and architecture of buildings, early urbanisation and rural/urban migration in developing countries.
2. Planning concepts, models of urban structure, the physical character and form of urban settlements.
3. Locational theory: Residential, industrial, Commercial, recreational and the linkage between them.
4. Development control, urban conversion and renewal.
   Note: In order to proceed to 2nd year, a student must pass this subject.

Planning Design II (Continuous Assessment)
Recommended lecture periods 6 per week (1 Theory and 5 Practicals)
2. Techniques of design: The process of analysis, concepts and proposals of layouts and urban design.
4. Techniques of presentation: conceptual sketches, plans, written reports and photographs.
   Note: See Drawing I above.

Survey & Analysis I (Examination)
Recommended lecture periods 5 per week
1. Survey Techniques.
2. Data Collection and Analysis Qualitative and Quantitative.
3. Land use surveys.
4. Demographic surveys.
5. Regional Surveys

**Note:** In order to proceed to second year, the student must pass this subject.

**Surveying I (Examination)**
Recommended lecture periods 5 per week (2.5 Theory and 2.5 Practicals)
1. Basic principles of surveying.
2. Distance measurement.
3. Determination of co-ordinates with polars and traverses.
4. Determination of heights, longitudinal and cross sections.
5. Area surveying with tachometry.
6. Areas and volumes.
7. The use of the level and theodolite.
8. South African co-ordinate system

**Civil Engineering I (Examination)**
Recommended lecture periods 5 Theory per week
1. Site analysis.
2. Provision of the following services: Roads, water, sewage, storm water, transport routes.

**Note:** Drawing I, Planning Design II, Planning I, Computer Skills and Survey and Analysis I are pre-requisite for entry into second year.

**Second Year Subjects**

**Planning Practice & Project Work II**
Recommended consultation periods 4 periods per week
Assignments covering the following will be set throughout the year.
1. Preparation of maps, diagrams and illustrations, based on data provided.
2. Layout design.
3. Calculation of density, bulk allowance and slope.
4. Compilation of written reports and the presentation of statistical information.
5. Special Consent Application.
6. Acquisition, analysis and interpretation of data used for Town & Regional Planning reports.
7. Regional planning theory

**Note:** Drawing I, Planning Design II, Planning I, Computer Skills and Survey and Analysis I are pre-requisite for entry into second year. In addition, the student may only carry two subjects into third year.

**Work Integrated Learning (12 months)**
Work Integrated Learning must be undertaken at an approved place of work, and be under the control of a registered Town Planner. The criteria for evaluation will be determined by the institution together with the employer. Once a student is employed, a Departmental Work Integrated Logbook will be issued to the student.

Diversity of tasks of the required for Work Integrated Learning:
1. Graphic Communication - preparation of plans, preparation of diagrams and illustrations, preparation of maps and plans from survey data, compilation of written reports, presentation of statistical data.
2. Planning Surveys - Acquisition of Data, Analysis of Data and Interpretation.

Students are to present task sheets approved by employer at regular intervals.
Visits by the institution’s staff to employers, will be undertaken.

**Furthermore, a student is required to submit the issued logbook, duly**
completed, in order to qualify for graduation, as contained in Item 4 “Procedure for Completion of Logbook” in the Department Work Integrated Learning Logbook.

Third Year Subjects

**Computer Applications III (Continuous Assessment)**
Recommended lecture periods 8 per week (6 lectures and 2 Tutorials)
1. Development of algorithms and programmes in a high level language.
2. Use of application programmes for surveying, town planning and computer-aided drawing.
3. Database management systems.

**Development Planning III (Examination)**
Recommended lecture periods 6 per week (+ 2 Tutorials)
1. Socio-economic development: Basic introduction to macro and micro economics, economic systems and principles, allocation of scarce resources, supply and demand, factors of production, land as an economic commodity, economics of land use and development, globalization, unemployment and informality.
2. Economic growth and development, Regional Planning theories.
3. Planning and Government Systems, approaches to integrated development planning.
4. Planning, Climate change and sustainability
5. Urbanisation and urban systems.
6. Housing development: Legislation, availability of land for housing, the delivery systems, types of housing, financing sources, application of appropriate technology, community participation.
7. Case studies.

**Legal Principles I (Examination)**
Recommended lecture periods 4 Theory per week
1. Introduction to the law.
2. Different divisions of the South African system of Government.

**Legal Procedures II (Examination)**
Recommended lecture periods 5 Theory per week
1. The legislative planning context in South Africa.
2. The historical context including planning legislation relating to the former KwaZulu and former Natal areas.
3. Township establishment and land use control procedures for KwaZulu-Natal.
4. Introduction to environmental law in South Africa.
5. Legislative context for development planning with an emphasis on Municipal Systems Act No.32 of 2000 and KwaZulu-Natal Planning and Development Act No. 6 of 2008 and Spatial Planning and Land Use Management Act No. 16 of 2013

**Planning Design III (Examination)**
Recommended lecture periods 10 per week (5 studio and 5 lecture)
1. Site Analysis: City form; Public and private spaces; Housing Typologies and Density; Site Analysis Techniques
2. Urban Layout: Neighbourhoods and Threshold; Urban Design Concepts; Level of Services; Design guidelines; Layout and subdivision; sustainability and Design.
3. Informal Residential Design: In situ upgrading; De Facto Survey; Housing Project Cycle; Design Principles
4. Industrial/Commercial/Mixed Use Design: Mixed-use development; Shopping Hierarchy; Mixed use Design standards
   Note: Students will not be allowed to enrol for this subject unless they have successfully completed their second year.

Statistics I (Examination)
Recommended lecture periods 5 per week (4 Theory and 1 Tutorials)
1. Frequency distribution: organisation of data, graphic presentation.
3. Regression and Correlation.
4. Non-parametric tests.

Brief Outline of Syllabi
B. TECH: TOWN AND REGIONAL PLANNING
Planning Design IV (Examination)
Recommended lecture periods 4 per week (1 Theory and 3 Studio)
1. Metropolitan planning: theoretical frameworks.
2. Spatial Frameworks.
3. Local Area Plans and Precinct Plans.
4. Layout design: Feasibility study.
The submission of a series of design projects will form part of this course.

City & Regional Planning (Examination)
Recommended lecture periods 4 Theory per week
1. Regional Planning
   Overview of Development Theory
   Theory and Approaches to Regional Planning
   Urban and Regional Resource Management
   Transportation
   Current Structures and Policies
2. Urban Planning
   Overview of Urban Processes
   Metropolitan Planning and Management approaches
   Land and housing SA policy and provision
   Globalisation and sustainability: impact on urban planning
   Urban regeneration

Environmental Studies (Examination)
Recommended lecture periods 3 Theory per week
1. Ecology
   Nutrition, Use of Matter and energy flows
   Limits and Limiting factors
   Habitats and niches
   Interactions between Organizations
   Stability and Stress
   Changes in populations, communities and ecosystems
   Classification and organisation in the ecosphere
2. **Environmental Issues**
   - Population
   - Socio-economics factors
   - Local and global issues

3. **Environmental Management & Planning**
   - Global to local perspective
   - Government, non-government and business
   - Environmental assessment

4. **Evaluative Techniques**
   - Basic to advanced techniques
   - Analysis and presentation

5. **Project Work**
   - Project/s relating to ecology, environmental issues and environmental management, using appropriate evaluative techniques for analysis and presentation

**Geographic Information Systems IV (Examination)**
Recommended lecture periods 4 per week

1. **Theory & Principles of GIS**
   - General concepts
   - Data acquisition and management
   - Raster and vector GIS
   - GIS analysis
   - GIS output
   - Advanced concepts

2. **Software Training**
   - Data capture tools and techniques
   - Data analysis
   - Data presentation

3. **Project Work**
   - Completion of GIS projects involving data capture, analysis & output in hardcopy and digital format.

**Management IV (Examination)**
Recommended lecture periods 3 Theory per week

1. Human relations in organizations
2. Principles and practice of management
3. Financial management
4. Office organization and professional practice
5. Team-Building and Conflict resolution
6. Project management
7. Integrated Development Plans (IDPs)
8. Area Based Management approaches

**Community Studies (Examination)**
Recommended lecture periods - 2 Theory per week

1. Planning theory
2. Concepts and theories of community - sociological/ anthropological aspects and the challenges of modernization
3. The South African Context of Urban and Rural Communities in South Africa - challenges for reconstruction and participatory development in South Africa.
4. Participatory planning techniques and methodologies.
5. Community participation in the planning process - case studies (international and local).
5.6 Diploma Phase-out Plan
(As approved by the University Senate on 26 August 2015)

Important information for current and prospective students (effective as of January 2016):
The current National Diploma: Town and Regional Planning shall be phased out starting in 2016 to allow for the introduction of new qualifications which must comply with the requirements of the new Higher Education Qualifications Sub-Framework.

The last cohort of first-time entering students admitted to this National Diploma qualification will be in January 2016.

Notwithstanding all the current rules (both the General Rules and Departmental Rules) that regulate this diploma, the last registration in which any student may register for each of the subjects is listed as follows:

<table>
<thead>
<tr>
<th>Code</th>

</table>

The dates stated in this rule are subject to change depending on the effective approval date for the new HEQF aligned programmes.

Please note that due to National legislation, signed into effect by the Minister of Higher Education in the Government Gazette no. 40123 of 6th July 2016, the last permitted enrolment for any non-HEQSF aligned programme will be the 31st December 2019. This means that you will not be able to enrol in a Bachelor of Technology (BTech) degree at DUT, or at any other institution in South Africa after this date.

5.7 Bachelor of Technology Phase-out Plan

The last cohort of first time entering students admitted to the Bachelor of Technology (BTTRP1) qualification will be January 2019. Notwithstanding the current rules (both General Rules and Departmental Rules) that regulates this degree, the last year in which any student may register for each of the subjects is listed as follows:
<table>
<thead>
<tr>
<th>Code</th>

6. PROGRAMME STRUCTURE BACHELOR DEGREE OF THE BUILT ENVIRONMENT IN URBAN & REGIONAL PLANNING (BBURP1)

The focus of the programmes offered is to develop graduates with critical problem solving skills that support theory and practice in application. This requires reflective practice as a foundational pedagogy in the development of curriculum and the students’ experience of the modules they undertake. Most of the modules offered include theory and practice and the ability to solve problems ranging from more simple technical issues in the first levels of study to more complex and creative responses in higher levels of study.

Expected graduate outcomes

1. Able to apply knowledge of research theory and techniques to address the problems arising in cities and regions in contemporary South African society.
2. Apply planning theories and a knowledge of planning histories to the design, management and implementation of planning to bring about positive change and societal benefits within human settlements.
3. Apply, engage and reflect on complex issues and legislative contexts in order to inform processes to initiate, manage and control land use changes in the natural and built environment.
4. Apply communication skills in retrieving and disseminating information.
5. Able to identify and respond to planning issues within the ethical boundaries of the planning profession, which encompasses an orientation to social justice, an appreciation of diversity and complexity of cultures and views, and the promotion of efficient resource use and sustainable development.
6. Able to analyse the given context, apply policy and legislation requirements and integrated planning principles in complex planning environments, as these pertain to strategic planning, management and project management across governance scales.
7. Apply scoping and site surveying techniques and appropriate technologies to analyse sites and solve problems.
8. Able to assist in optimizing the sustainable use of resources within the built and natural environment.
9. Apply professional conduct and ethical principles in undertaking any planning work.

The focus of the programmes offered is to develop graduates with critical problem solving skills that support theory and practice in application. This requires reflective practice as a foundational pedagogy in the development of curriculum and the students’ experience of the
modules they undertake. Most of the modules offered include theory, practice, and the ability to solve problems ranging from more simple technical issues in the first levels of study to more complex and creative responses in higher levels of study.

Key aspects are introduced from year 1 and built up to year 3. This is evident from the module titles that run through the three year programme within broad themes. These include:

- **Design**: Planning Design 1A, 1B, 2A, 2B, 3A, 3B
- **Environment**: Sustainable Earth Studies, The Global Environment, Environment Management and Techniques;
- **Planning Theory**: Settlement History 1, Urban Planning Theory and Practice 1, Sociology and Society, Urban Planning Theory, Regional Development and Planning and Planning Sustainable Cities and Regions;
- **Research**: Statistics for the Built Environment, Academic Literacy, Communication Literacy 1, Research Methods 1, Geographic Information Systems 1, Research Methods 11, Geographic Information Systems 11 and Research Project;
- **Land Use**: Site Surveying 1, Introduction to Principles of Law, Economics for the Built Environment, Planning Law, Restorative Justice, Transportation Planning and Infrastructure Systems and Applied Land Economic for the Built Environment;
- **General Education**: Cornerstone 101.

### 6.1 Programme Structure

The programme is structured according to modules as referred to in Table 3 below. All modules listed are compulsory in order to qualify in this Programme.

C* = Core modules; F** = Fundamental
URP = Urban and Regional Planning Modules
FEBE = Built Environment Cluster of the Faculty of Engineering and the Built Environment Modules
GE = General Education Institutional Modules
CA = Continuous Assessment

Note: The qualification structure is made up of 360 credits.

General Education Modules
In terms of the approved DUT Guidelines, the proposed primary programme qualifications will include up to 30% general education component that compromises of general education modules, which all students across the University may access. In terms of the General Education document,
the modules are distributed across the Faculty and the University and are delivered outside of the Department. This opens up flexible and cross-disciplinary leaning for students. At a detailed level this means that all DUT students will register for Cornerstone 101 (12 credits module) in the first semester. Furthermore, students will register for a suite of modules across the university and these are included in the list below (8 credits each).

- Cornerstone 101
- Sustainable Earth Studies
- Sociology and Society
- The Global Environment
- Restorative Justice

In effect the general education component aligns closely with the Professional Body SACPLAN generic principles and makes the professional body competencies explicit and integrated in the curriculum.

- Electives

In addition, students may elect to take French or Mandarin in their second and third years of study.

6.2 Promotion to a Higher Level and Pre-requisites / Rules of Progression

Students are referred to this Department of Town and Regional Planning Handbook, in which the rules and regulations are outlined, as well as the DUT General Handbook for Students, at registration. It is incumbent on the student to familiarise him or herself with the contents thereof. These rules and regulations as set out in the relevant documents and handbooks, are binding.

The following are the rules of combination for the programme Bachelor in the Built Environment (Urban and Regional Planning). These must be read with reference to the G16 Rule in the General Handbook for Students.

6.2.1 The minimum pass mark for all modules is 50%.

6.2.2 The combination and progression of modules from one year to the next requires that a student must pass a specified module in the previous year or semester of study in order to proceed to the next semester or year as outlined in the Table 3 above.

In order to advance to the next year of study (From first, second, or third year), the student must have met the direct pre-requisites for any module, as set out in the Table 3 above, and as outlined below.

From year one to year two the student will be allowed to register for modules in the second year of study provided they have passed at least seven out of the ten modules in the first year.

Provided that all prerequisite rules are met, the student may combine year one and year two modules in year two.
From year two to year three, the student will be allowed to register for modules in the third year of study provided they have passed at least eight out of the twelve modules in the second year.

The student shall pass ALL the modules in year one BEFORE he/she is permitted to register for ANY modules in the third year of study.

6.2 Subject Content

NB: Students to read this section in conjunction with the relevant study guides.

Brief outline of Syllabi

BBURP1 Bachelor Degree of the Built Environment in Urban and Regional Planning

PLDS111 Planning Design 1A Semester 1 (Continuous Assessment)

a. Developing drawing and plan-making skills:
   1. Town planning conventions for drawing, printing and stencilling with technical pens.
   2. Guidelines for drawing a base plan using town planning conventions such as appropriate line weights, placement of north point, scale bar, information box.
   3. Guidelines to draw a simple plan and elevation of a building.

b. Site analysis:
   4. On-site observation and analysis.
   5. Lynch theoretical framework and analysis.
   6. Construction of a basic topographical model and built features.

c. AutoCAD drawing skills:
   7. Basic knowledge of hardware to run AutoCAD software.

SSRV101 Site Surveying 1 Semester 1 (Continuous Assessment)

a. Site Analysis and Development
   1. Measure distances using a range of scales.
   2. Calculate a change in scale.
   3. Calculate slope and area.
   4. Analyse slope.
   5. Calculate density.
   6. Draw a cross section using a range of scales.
   7. Draw cut and fill banks.
   8. Analyse main site features.
   9. Explain site development in terms of road design, storm water runoff and management, sewerage system design and management, water reticulation and electrical provision.

b. Site Surveying
   1. Basic principles of surveying
   2. Distance measurement
   3. Determination of co-ordinates with polars and traverses
4. Determination of heights, longitudinal and cross sections
5. Area surveying with tachometry.
6. Areas and volumes.
7. The use of the level and theodolite.
8. South African co-ordinate system

**STBE101 Statistics for the Built Environment Semester 1 (Examination)**
1. Frequency distribution: organisation of data, graphic presentation.
3. Inferences concerning averages and standard deviation.
4. Regression and Correlation.
5. Non-parametric tests.

**ACDL101 Academic Literacy Semester 1 (Examination)**
1. Understand practices and tools to support effective and simple written, oral, visual and graphic presentations.
2. Understand types and sources of information to support decisions making and research.
3. Understand the ethics of acknowledging the sources to knowledge and be able to apply the DUT Harvard Reference Style to written documents and manage references through appropriate technology.
4. Effectively summarise documents and reports related to the disciplines of architecture, construction studies and urban and regional planning.

**STHS101 Settlement History 1 Semester 1 (Examination)**

**a. The history and the evolution of human settlements**
1. Pre-history and Early Cities.
2. Greek period.
3. Roman Empire period.
4. Medieval period.

**b. Contemporary Cities and the Evolution of the South African City**
1. Pre-colonial societies, space and settlement patterns in South Africa.
2. The Renaissance City
3. The Industrial City and the Garden City response
5. African Cities

**PLDS121 Planning Design 1B Semester 2 (Examination)**

**a. Site Analysis:**
1. Understanding the physical and socio-economic context.
2. Landscape analysis - geographical form and ecological constraints.
3. Theoretical approaches and methodologies: SWOT analysis and Lynch analysis.
4. How does analysis lead to design? - Development of a proposed concept and plan.
   b. Layout and Design:
      1. Impact of infrastructure services on the layout;
      2. Housing typologies: housing densities calculations in relation to the given study area.
      3. Land use planning design standards in the design process;
      4. Components of a town planning layout and sub divisional plan.
      5. Appropriate land use management controls related to proposed development.
   c. AutoCAD:
      1. Dimension using variable options and settings;
      2. Create blocks and understand their ability in creating a personalised library;
      3. Draw to scale and understand the benefits and calculations associated with different scales used in a single CAD generated drawing;
      4. Calculate areas and understands the options available which relate to budget, and
      5. Export/import data files from different software packages and have knowledge of complications involved in their conversion.

Prerequisite: Planning Design 1A (PLDS111), Site Surveying 1 (SSRV101)

UPTP101 Urban Planning Theory and Practice 1 Semester 2 (Examination)
1. Introduction to the development of planning as a discipline and profession and associated areas of practice and theories
2. Introduction to theories of planning and planning processes
3. Introduction to the definitions of planning and planning thought
4. Introduction to procedural and substantive planning theory and practice
5. Introduction to settlement planning and urbanisation post World War 2, the roots of contemporary planning practices and theories
6. The planning process as a response to social, political, physical and economic factors.
7. Settlement history in South Africa: the influences of government, markets in South Africa

Prerequisite: Settlement History 1 (STHS101)

CMCL101 Communication Literacy Semester 2 (Continuous Assessment)
1. Express ideas in a clear, organised and effective manner verbally, written and graphic representation.
2. Evaluate documents and reports related to the disciplines of architecture, construction studies and urban and regional planning.
3. Understand the ethics of acknowledging the sources to knowledge and be able to apply the DUT Harvard Reference Style to written documents.
4. Apply appropriate technology in order to:
   a. Create, edit and enhance standard documents using Microsoft Word and write effective, correctly formatted reports.
b. Create effective basic Microsoft Office PowerPoint Presentations

**Prerequisite: Academic Literacy (ACDL101)**

**CSTN101 Cornerstone 101 Semester 2 (Continuous Assessment)**
1. Identify and question particular constructions about themselves and others in the context of a diverse society.
2. Develop communication practices appropriate to higher education.
3. Demonstrate values of respect, accountability and responsibility in relation to society and environment.

**SERS101 Sustainable Earth Studies Semester 2 (Continuous Assessment)**
1. Explain the holistic nature of the biosphere concept describing the unique position and significance of the earth as a planet in the universe;
2. Discuss how the earth is mapped with respect to a range of economic and environmental applications;
3. Describe key physical features that shape the global and local environment and their impact on human behaviour; and,
4. Explain and recognise the significance of biodiversity and the functioning of healthy ecosystems
5. Relate environmental sustainability to his/her personal and professional life

**PLDS211 Planning Design 11A Semester 3 (Continuous Assessment)**

a. Context and Analysis:
   1. Overview of spatial planning 20th and 21st century concepts.
   2. Spatial planning concepts within a metropolitan context: such as nodes, corridors, as found in the Compact City approach.
   3. Elements of city form.

b. Urban Design:
   1. Introduction to urban design.
   2. Urban design principles and tools - such as traffic calming, design of hard and soft open spaces, articulation of sub-divisional, road and parking layout systems.
   3. Design principles that aim to achieve sustainable environments.
   4. Urban morphology analysis at neighbourhood scale.
   5. Performance analysis of public and private spaces and urban design as a design response to intervening in these spaces.
   6. Introduction to planning standards and guidelines to a range of contexts, including calculating the threshold and range to sustain the use of facilities.
   7. Urban design implications of transportation, infrastructure services and social facilities.

**Prerequisite: Planning Design 1B (PLDS121)**
UPTH201 Urban Planning Theory II Semester 3 (Examination)
1. Introduction to human geography concepts.
2. Urbanisation and settlement theories.
3. Introduction to transport planning.
4. Housing and planning.

Prerequisite: Urban Planning Theory and Practice I (UPTP101)

MPPM101 Management Principles and Project Management Semester 3 (Examination)

a. Management Principles:
1. The nature of management, evolution of management theory, strategic planning, problem solving and decision making, organizing and delegating, managing diversity, leadership, groups and teams in the organization, motivation, ethics, corporate social responsibility and corporate governance.

b. Project Management
1. Components of the project management body of knowledge, methodology, typical project components, specifically budgets & time frames [Gantt chart, Excel budget, PERT chart].
2. Components of a typical planning project proposal.
3. Logical Framework as a management system and as a project proposal writing tool.
4. Housing project management, specifically project preparation and analysis of a detailed housing project cycle

RMDS201 Research Methods I Semester 3 (Examination)
1. Types of research and the research question
2. Data Collection
3. Data Presentation and Reports
4. Qualitative Research
5. Documents as Sources of Data
6. Data Analysis Qualitative and Quantitative
7. Typical Data Collection in Town and Regional Planning

Prerequisite: Statistics for the Built Environment (STBE101)

IPLW101 Introduction to Principles of Law Semester 3 (Examination)
1. Constitution of South Africa
2. Structure of current South African law
3. Sources of South African law: Roman-Dutch, English, case law and common law
4. The State: Parliament, Government and Judiciary
5. Para-state institutions and the built environment
7. Land ownership, land reform and the built environment
GENV101 The Global Environment Semester 3 (Continuous Assessment)
1. Differentiate between various types of environmental pollution and its impact (social, economic and personal)
2. Describe the social, economic and environmental impact of human population growth
3. Explain the consequences of climate change on human health, natural resources and biodiversity
4. Identify the inter-relationships between sustainable development, social responsibility, economic development and environmental protection.

PLDS221 Planning Design 11B Semester 4 (Examination)
a. Site Analysis:
   1. A range of site analysis approaches and methodologies will be applied in order to spatially analyse an area and inform the development of a concept and proposed development.
b. Layout and design for residential development:
   1. Transportation, infrastructure services to planning layouts;
   2. Housing typologies - implications for layout design and densities to planning layouts;
   3. Land use planning design standards, land use allocations and management controls in planning layout design;
   4. Required components for a town planning layout and sub divisional plan.
c. Industrial/commercial/mixed-use design:
   1. Industrial/commercial/mixed-use land use and design performance considerations to site development.
   2. Retail/ shopping hierarchy concepts – implications for site development, including informal markets.
   3. Key concepts and design considerations related to mixed- use and corridor developments.
   4. Required components of a sub divisional plan for a range of land uses.

Prerequisite: Planning Design 11A ((PLDS211))

EVMT101 Environmental Management and Techniques Semester 4 (Continuous Assessment)
1. Environmental planning & management (EPM) action at various scales: from global to regional to national to sub-regional to urban to local neighbourhoods & to site specific.
2. Governmental & non-governmental approaches to EPM.

Prerequisite: Management Principles and Project Management (MPPM101)

RDVP101 Regional Development and Planning Semester 4 (Examination)
1. Regional Planning concepts.
2. Context of development planning and regional planning, and approaches to development
planning.
3. Regional Planning theory.
4. Sustainable regional development.
5. Regional Planning in South Africa.
6. Rural and agrarian development.

Prerequisite: Urban Planning Theory 11 (UPTH201)

GISY101 Geographic Information Systems I Semester 4 (Continuous Assessment)
1. Demonstrate understanding of the theoretical concepts underlying the software.
2. Capture or convert data for use in analysis.
3. Analyse data by establishing trends, patterns, associations & relationships amongst different data sets.
4. Present data in a range of ways that makes the information understandable & meaningful to the user.

Prerequisite: Planning Design 11A (PLDS211)

ECBE101 Economics for the Built Environment Semester 4 (Examination)
a. Introduction to the basic principles of micro economic theories:
   1. Free Market theory
   2. Welfare economic theory
   3. Keynesian economic theory
   4. Marxist theory
b. Key economic concepts and themes and application to the built environment.
c. Key macro-economic concepts and application to the built environment:
   1. Analysis of different types of markets / economic systems.
   3. Economic structures and financial flows, national income accounting, economic and social indicators of growth and development, poverty, the role of the state and public finance, labour economics and labour markets, monetary and fiscal policy, inflation and stagflation.
   4. The broader social consequences of economic decision making for society.

Prerequisite: Urban Planning Theory 11 (UPTH201)

SSCY101 Sociology and Society Semester 4 (Examination)
a. Perspectives on Sociology
   1. An introduction to the theoretical and conceptual foundations of Sociology.
   2. Sociology as a science and a social science.
b. Culture and Society
   1. Concept of culture and society, norms and values, diversity, ideology, power.
   2. Types of Societies pre-modern (Hunting and gathering, pastoral, agrarian) traditional Industrial with first, second and third worlds.
c. Gender and Sexuality
   1. Gender socialization.
2. Patriarchy, power and production.
d. Stratification and Class Structure
1. Systems of social stratification.
3. Poverty and inequality.
e. Globalization
1. Changes in formation of the state, changes in the production and interdependence of the World Society
2. Economic consequences of colonization.
3. Transnational Corporations.
5. Examination of the process of globalisation with respect to the South African context.

**Prerequisite: The Global Environment (GENV101)**

**FRST101 French for Sciences and Technology I (Continuous Assessment) (Elective)**
1. Apply basic French language skills and competencies with focus on SET.
2. Interact in French for professional activities (do a resume, a professional interview, a meeting).
3. Produce basic written texts in French with focus on SET.
4. Pursue introduction to French and francophone culture.

**MNST101 Mandarin for Sciences and Technology I (Continuous Assessment) (Elective)**
1. Apply basic Chinese language skills and competencies with focus on SET.
2. Produce simple sentence structures.
3. Provide simple descriptions.
4. Exchange some basic information.
5. Interact in Mandarin for professional activities (do a resume, professional interview, a meeting).
6. Produce basic written texts in Chinese with focus on SET.
7. Gain introductory Chinese cultural knowledge and acquire preliminary cross-cultural awareness and international perspectives.

**PLDS311 Planning Design 111A Semester 5 (Continuous Assessment)**

a. Spatial planning - theories and policies:
Exposure to current theories, policies and legislation that impact on spatial planning at a national, municipal, metropolitan and sub-metropolitan scale. The policy context – at national, provincial and municipal level.
b. Positively performing environments project:
Theoretical constructs and policies related to the compact city paradigm to given study areas. The focus is on mixed land use activity corridors and positively performing environments,
metropolitan spatial concepts and spatial development frameworks, and emphasis on movement systems and land use inter-relationships. Theoretical constructs include: compact city, new urbanism, mixed-use corridor development, spatial frameworks at metropolitan and sub-metropolitan scale. The project extends the learner’s design skills, with the focus on analytical and concept diagrams, and emphasises the theoretical underpinnings of spatial planning and design concepts.

**Prerequisite: Planning Design 11B (PLDS211)**

**PLLW101 Planning Law  Semester 5 (Examination)**

a. Applications related to the preparation and approval of plans
   1. Integrated Development Plans
   2. Spatial Development Frameworks
   3. Land Use Schemes
b. Applications related to changes in land use, activity, intensity and development rights
   1. Scheme amendments and rezoning
   2. Special Consent
   3. Develop Applications
   4. Enforcement.
c. Applications related to township establishment, subdivision and land ownership
   1. Consolations and subdivisions
   2. Removal of Restrictive Conditions
   3. Act 70 of 1970
d. Process of appeals against decisions
   1. Municipal Systems Act and Appeals
   2. Spatial Planning and Land Use Management Act No 16 of 2013 and Appeals
   3. Planning and Development Act No 6 of 2008 and Appeals
e. Land Reform Legislation
f. Environmental Legislation
g. Housing Legislation

**Prerequisite: Introduction to Principles of Law ((IPLW101))**

**TPLI101 Transportation Planning and Infrastructure Semester 5 (Examination)**

1. Theories, processes and methods of transport and infrastructure planning.
2. Traffic and Transport Surveys.
3. Transport planning.
4. Infrastructure, urban planning and cities.

**Prerequisite: Regional Development and Planning (RDVP101)**

**RMDS201 Research Methods II Semester 5 (Continuous Assessment)**

1. Types of Research
2. Research question and the research hypothesis
3. Review of the literature
4. Sampling Plan
5. The research proposal
6. The Ethical Review

Prerequisite: Research Methods 1 (RMDS101)

GISY201 Geographic Information Systems 11 Semester 5 (Continuous Assessment)

a. GIS Project Management Steps (GPMS)
   1. Project & Work Flow Charts
   2. Creating secondary data from primary data
   3. Analysis
   4. Presentation/Visualization

b. Site suitability analysis
   1. Case studies applying GPMS

c. Opportunities & constraints Analysis
   1. Site – regional case studies applying GPMS

d. Pattern Analysis
   1. Site – regional case studies applying GPMS.

Prerequisite: Geographic Information Systems 1 (GISY101)

ALEB101 Applied Land Economics for the Built Environment Semester 5 (Examination)

1. Introduction to the basic principles of land economics:
   Land use economics and impacts on urban and rural land markets, Location decisions of firms supply and demand and land competition, Economic characteristics of real estate markets, Informal land markets.

2. Key concepts and themes and application to the built environment:
   Planning and social welfare economics, Externalities – positive / negative, Public goods, Imperfect information / imperfect markets, Pareto efficiency. Settlement theory and modelling – Christaller, Loch, Berry, Friedmann

Prerequisite: Economics for the Built Environment (ECBE101)

PLDS321 Planning Design 11B Semester 6 (Examination)

1. Feasibility Layout: quantification of residential, commercial uses and floor area yields for various land uses, responsiveness to context and design concepts.

2. Local Area Plan/Precinct Plan: contextualise and develop a spatial framework plan, reports and plans using existing policy documents and sector plans to test proposed concept plan, planning strategy, proposed land uses, densities, transport routes, etc.

3. Develop a land use management framework in plan and report format.

Prerequisite: Planning Design 11B (PLDS221)

PSCR101 Planning Sustainable Cities and Regions Semester 6 (Examination)

1. Principles, methods and planning practices for developing sustainable cities and regions.

2. Establishing the links between economic, social and environmental aspects in relation to sustainable urban and regional development.
3. Sustainable management principles, methods and practices, and models.  
   **Prerequisite: Transportation Planning and Infrastructure (TPLI101)**

**RPRO101 Research Project  Semester 6 (Continuous Assessment)**  
The student conducts a research project which includes: a title, an abstract, an introduction, definition of the problem, identifying the research question, a literature review, motivates the need for the research, explains the aims of the research, the methodology, ethical considerations, details of sample and participants, describes data collection and instruments, analyses results, discusses results and makes conclusions and recommendations.  
   **Prerequisite: Research Methods 11 (RMDS201)**

**PMPL101 Public Management and Planning Semester 6 (Examination)**  
1. Overview of municipal management.  
2. Municipal management as a strategic planning: context, purpose and challenges of municipal planning.  
3. The statutory and regulatory framework of operationalising municipal management in South Africa.  
4. Integrated Development Planning and municipal strategic planning and management: key components of plan and process.  
6. Case study research.  
   **Prerequisite: Environment Management and Techniques (EVMT101)**

**RSJS101 Restorative Justice Semester 6 (Continuous Assessment) (Elective)**  
1. Relevance of a restorative approach in the South African context.  
2. Aspects of legislation and policy.  
5. The social control window.  
6. Restoration versus retribution.  
7. Shaming, integration, healing and forgiveness.  
8. The restorative practice continuum.  

**FRST201 French for Sciences and Technology II (Continuous Assessment) (Elective)**  
1. Pragmatic components.  
2. Linguistic components.  
3. Cultural components.  
   **Prerequisite: French for Sciences and Technology I (FRST101)**

**MNST201 Mandarin for Sciences and Technology II (Continuous Assessment)**
(Elective)
1. Pragmatic components.
2. Linguistic components.
3. Cultural components.

Prerequisite: Mandarin for Sciences and Technology 1 (MNST101)

6.3 Unsatisfactory Academic Progress
The above rules of progression are to be read in combination with G 17 (1) and G23B of the General Handbook in determining Unsatisfactory Academic Progress.
6.3.1 A student who fails a module twice shall be found to have made unsatisfactory academic progress.
6.3.2 A first year student who fails three (3) or more modules with a final mark of less than forty percent (40%) in these modules, will not be permitted to re-register in the programme.

6.4 Interruption of Studies
Rule G1(5) applies to registration in an instructional programme. If, for whatever reason, the student does not register consecutively for every year/ semester of his/ her programme, the existing registration contract with the Institution will cease. Any re-admission will be at the discretion of the Institution and, if permitted, will be in accordance with the rules applicable at the time of re-admission.

7 ASSESSMENT RULES FOR BBURPI

7.1 The final mark shall be made up of the average of assessments, both practical and theoretical, during each module of the programme. There are a combination of final examinations and continuous assessments in the various modules in the programme. The details pertaining to assessment for each module offering are contained in the module Study Guides.

7.2 Duly Performed / Course Mark / Examination Mark
The minimum Duly Performed (DP) semester mark for examination is 40%
The final mark is made up of 50% Course Mark and 50% Examination Mark, unless otherwise indicated (e.g. continuous assessment).

Classifying Student Performance:
(This refers to the composite evaluation result for each module.)
75% and above: Distinction (Refer rule G15)
50% and above: Pass
45% - 49%: Eligible for re-assessment
44% and less: Fail

7.3 Rules G 13 (3) (a) & (b) shall be applied mutatis mutandis to students who have missed an examination assessment.
8. PROGRAMME STRUCTURE MASTER DEGREE OF THE BUILT ENVIRONMENT (MBTRPI)

This 180 credit qualification at NQF Level 9 is intended for persons who will make a contribution, through research, to understanding the application and evaluation of existing knowledge in a specialized area of urban and regional planning. They will also demonstrate a high level of overall knowledge in that area ranging from fundamental concepts to advanced theoretical or applied knowledge. This is a one year research degree.

The G-rules for Masters as contained in Rules G24, G25 and G26 of the DUT General Handbook apply, as does the DUT Postgraduate Student Guide.

Selection Procedure
Application for the Masters programme is open to students who meet the requirements as per the G Rules above. Students are encouraged to contact the Masters Co-ordinator either telephonically (+27 31 3732673) or by email via the Secretary. Prospective students are required to submit a written motivation for undertaking the Masters, and are to submit a 500 word abstract on their intended research area to the Masters Co-ordinator by November for entry for the following year.

Selection of students is made by a panel of senior academic staff, using a ranking system. The ranking system includes the following criteria: relevance of the existing qualification; academic record; professional experience; research proposal; and motivation for admission, and is evaluated using a ranking of: highly relevant, relevant, average, partly relevant and mismatch. Students will be informed of the outcome of their application by the end of January of the following year.

Once selected for the Masters programme, all students will register as per the DUT Postgraduate Student Guide. All students are required to undertake a research methodology module, which includes the refining of the research proposal and acceptance thereof by the Faculty Research Committee before full registration can take place as per the G24 (2) rules.

Registration
Dates of registration will be according to the University calendar as applicable to higher degree students and Rule G25(2)(c).

Interruption of Studies
If, for whatever reason, a student does not register consecutively for every year of the programme, his/ her existing registration contract with the University shall cease unless the student has applied to the Department for permission to interrupt studies in accordance with the guidelines in the Post-Graduate Student’s Guide. Where such permission has not been given, re-registration will be at the discretion of the University and, if permitted, will be in accordance with the rules applicable at that time.
