HANDBOOK FOR 2016

FACULTY OF MANAGEMENT SCIENCES

DEPARTMENT of HUMAN RESOURCES MANAGEMENT

DEPARTMENTAL MISSION

To serve the needs of Human Resources Management student by enabling quality teaching, learning, research and community engagement by providing quality teaching that incorporates integrated workplace learning.

What is a University of Technology?

A university of technology is characterized by being research informed rather than research driven where the focus is on strategic and applied research that can be translated into professional practice. Furthermore, research output is commercialized thus providing a source of income for the institution. Learning programmes, in which the emphasis on technological capability is as important as cognitive skills, are developed around graduate profiles as defined by industry and the professions.

Bachelor of Technology in Human Resources Management

ND: Human Resources Management.

The B.Tech Human Resource Management will be phasing out and the Advanced Diploma and Post Graduate Diploma is to be introduced in 2019.

4. PROGRAMME INFORMATION

The department offers the Diploma: Human Resource Management, the Diploma: Management Sciences (Human Resources Management) and the BTech: Human Resources Management on a full time and part time basis.

The M.Phil and PhD are offered on a part-time basis.

The full-time instructional programmes are offered to students between 08:00 and 16:50 daily. For those who are employed, a part-time lecture programme is arranged between the hours of 17:00 and 20:00. The programme content, final examinations and diploma issued are the same for both groups. The full-time students, being generally younger, lacking extended practical experience, and having more time available, are given a more detailed lecture programme and more personal attention. The more mature students who attend the evening school frequently have the advantage of practical experience in the areas in which they are studying. This partly overcomes the pressure of work and the limited lecture and study times available to them. These part-time students must perform much of the work themselves, and as a result are encouraged to acquire their diploma over a longer time-period than the full time students.

The Diploma in Management Sciences (Human Resources Management) has been developed to produce competent graduates who are grounded in the fundamental theory and principles that underlie the practice and growth in this field. This 360 credit diploma is at a NQF level 6 and is aligned with the qualification description as per the HEQF. In keeping with the institution's aims of creating, maintaining and developing its relationships with commerce, government and industry, this diploma seeks to further strengthen the link between the institution and the world of work. The learning environment is flexible in both its mode of delivery and its methodologies, with a combination of formal face-to-face classes, technology based and independent learning contributing to the learners' experience
