

2017 HANDBOOK INFORMATION TECHNOLOGY

HANDBOOK FOR 2017

FACULTY OF ACCOUNTING AND INFORMATICS

**DEPARTMENT of
INFORMATION TECHNOLOGY**

Departmental Mission

Vision

Promoting leadership in business and related technology through real world education

Mission

Promoting quality in teaching and learning

Encourage a culture of ongoing research and technology transfer

Engage the business professions and other relevant stakeholders to provide relevant career focused education

Values

The Department prides itself as being innovative, participative, accountable, committed, and productive.

Goals

The goals of the Department are:

- To continuously produce a critical mass of quality IT graduates from sound teaching, learning, and assessment practices

- To produce and publish high quality applied research output in IT

- To significantly contribute to the empowerment of communities, society, and humanity, using IT as an enabler.

What is a University of Technology?

A university of technology is characterized by being research informed rather than research driven where the focus is on strategic and applied research that can be translated into professional practice. Furthermore, research output is commercialized thus providing a source of income for the institution. Learning programmes, in which the emphasis on technological capability is as important as cognitive skills, are developed around graduate profiles as defined by industry and the professions.

IMPORTANT NOTICE

The departmental rules in this handbook must be read in conjunction with the University's General Rules included in the Student Handbook.

The University reserves the right to change the contents without prior notice.

NOTE TO ALL REGISTERED STUDENTS

Your registration is in accordance with all current rules of the Institution. If, for whatever reason, you do not register consecutively for every year/semester of your programme, your existing registration contract with the Institution will cease. Your re-registration anytime thereafter will be at the discretion of the Institution and, if permitted, will be in accordance with the rules applicable at that time.

I. DEPARTMENT AND FACULTY CONTACT DETAILS

All Departmental queries to:

Secretary: Ms W Xulu
Tel No: 031 373 5446
Fax No: 031-373 5598
Location of Department: 2nd Floor IT block (East and West Wing) Ritson Campus

Faculty Query: Information Technology / ICT in Applications Development

All Faculty queries to: Ms D Small
Faculty officer: Ms N. Singh - Sakichand
Tel No: 031-3735418/5152
Fax to Email: 086 2626836
Location of Faculty office: East Wing, Hotel School Building, Ritson Campus

Faculty Query: Financial Information Systems

All Faculty queries to: Mrs B Nkosi
Faculty officer: Ms N. Singh - Sakichand
Tel No: 031-3735670/5152
Fax to Email: 086 6760873
Location of Faculty office: East Wing, Hotel School Building, Ritson Campus

Executive Dean: Prof Olugbara, Oludayo O, (Acting)

Executive Dean: Secretary: Beulah Martin

Tel No: 031- 3735597

Location of Executive

Dean's office: North Wing, Hotel School Building, Ritson Campus

2. STAFFING

Name and Qualification

Head of Department	Mrs Singh KB	Sc (Hons) Comp Sc, BEd (Hons) UHDE [UDW]
Professor	Prof Olugbara, Oludayo O,	PhD (Computer Science) [University of Zululand]
Associate Professors	Prof Eyono Obono S D,	PhD (Computer Science) [University of Rouen, France]
	Prof Richard C Millham,	PhD (Computer Science) [De Montfort University]
Associate Directors	Mrs Khan F T,	MSc [University of Sydney], BTech IT [MLST]
	Mr Ally M I,	ND EDP [MLST], NHD CDP [MLST]
	Dr Heukelman D,	DTech (IT) [DUT], Med Computers [Rhodes], BSc (Hons) [RAU], BSc (Ed) [RAU] NHD CDP [MLST]
Senior Lecturers	Asmal E, Foolchand S,	BSc (Hons) [UNISA], BCom [UNISA], UDE [UDW]

3. PROGRAMMES OFFERED BY THE DEPARTMENT

Programmes are offered in this Department which, upon successful completion, lead to the awarding of the following qualifications:

Qualification Name	Qualification Code	SAQA NLRD	Current Status
NEW Programme offerings			
Diploma in ICT in Applications Development	DIIADI	94697	Replaces ND: IT (Software Development)
Diploma in ICT in Business Analysis	Offered 2017	97709	Replaces ND: IT (Business Applications)
Diploma in ICT in Applications Development (4-year Foundation)	DIIAFI	94697	Replaces ND: IT Foundation
Masters in ICT	MICMTI	96833	Replaces MTECH: IT
PhD in IT	DPINFI	96804	Replaces DTECH: IT
CURRENT AND PHASE-OUT Programme offerings			
ND: Information Technology (Software Development)	NDINSI	72241	Last intake in 2015
ND: Information Technology (Business Applications)	NDINBI	72241	Last intake in 2015
ND: Information Technology (Foundation)	NDISFI	72241	Last intake in 2015
ND: Financial Information Systems	NDFIS2	72234	Last intake in 2015
BTECH: Financial Information Systems	BTFIS2	72134	Last intake in 2018*
BTECH: Information Technology	BTINF2	72142	Last intake in 2019*

*Numbers permitting

4. PROGRAMME INFORMATION (New programme offerings)

4.1 GENERAL

Student attendance

The department does not hold itself responsible for the recording of attendance of its students.

Conduct of students in laboratories

Rules of conduct pertaining to the specific laboratory as instituted by the head of the department, shall apply to all students registered for that subject.

- Eating, playing music, smoking or drinking in any lecture venue or laboratory is forbidden.
- Safety rules are to be strictly adhered to at all times.
- Mobile phones are to be switched off during lecture, laboratory and assessment sessions.

Course/ year marks

- With reference to Rule G15, the calculation of the year/semester mark for each subject will be indicated within the learner guide of each subject.
- In addition to the general requirements for a year mark as stipulated in Rule G15 the department reserves the right to recommend at the end of a reasonable portion of the course that a student withdraw from the course, either due to poor performance in the majority of subjects, or due to inadequate presentation of assigned work.
- A year/semester mark is valid only for the main examination in the year/semester in which a student is registered, plus the supplementary examination in that subject, if granted to the student in terms of Rule G16.

4.2 UNDER-GRADUATE PROGRAMMES

4.2.1 General Education

All undergraduate programmes at DUT include a General Education component which adds value by providing learning opportunities to help students think critically, develop values, understand traditions, respect diverse cultures and opinions, create an awareness of the environment and their role in protecting it, and most importantly, put that knowledge to use. The knowledge is holistic, not specialised; integrative, not fragmented.

In line with the embedded values of DUT (as outlined in the DUT Strategic Plan) the aim of General Education is:-

- To build a student-centred educational experience embedded in the local context.
- To prepare students for an increasingly diverse and complex globalised work environment.
- To cultivate an engaged and critical citizenry in the context of an emerging and fragile democracy in an ever changing world order.

4.2.2 Diploma in ICT in Applications Development

This new CHE-accredited Diploma offering in ICT (Applications Development) commenced in 2016. An augmented 4-year curriculum is devised in order to enhance student development and to improve the student's chances of successful completion. The department may accept a limited number of students into the second or third year of study, who's ICT Programme aligns with the University, subject to availability of space.

Normal duration

3 years full-time

4.2.3 Diploma in ICT in Business Analysis

This new CHE-accredited Diploma offering in ICT (Business Analysis) is offered for the first time in 2017. The department may accept a limited number of students into the second or third year of study, who's ICT Programme aligns with the University, subject to availability of space.

Normal duration

3 years full-time

4.2.4 Diploma in ICT in Applications Development (4 year Foundation)

An augmented 4-year curriculum is devised in order to enhance student development and to improve the student's chances of successful completion.

Normal Duration

4 years full-time

4.2.5 Career Opportunities

Software developers, Analyst/Programmers, IT Managers, Business Analysts
Information systems specialists with numerous entrepreneurial opportunities.

4.3 POST-GRADUATE PROGRAMMES

The department offers two post graduate qualifications namely, the MICT and the PhD. The Masters in Information and Communications Technology (MICTMTI) and the Doctor of Philosophy in Information Technology (DPINFI) are both full research requiring submission of a full-thesis for examination. There is no coursework.

Normal Duration

MICT

Minimum 1 year

Maximum 2 years

PhD

Minimum 2 years

Maximum 4 years

4.4 MINIMUM ADMISSION REQUIREMENTS

4.4.1 Diplomas in ICT

The requirement below represents the minimum into either a three-year **Diploma in ICT in Applications Development** or a three-year **Diploma in ICT in Business Analysis**.

ITDI In addition to the requirements of the General Rules (Rules G7 and G21 (b)), the minimum entrance requirement is a national Senior Certificate (NSC) or Senior Certificate (SC) or a National Certificate Vocational (NCV) that is valid for entry into a Diploma and must meet the following requirements:

Compulsory Subjects	NSC Rating	Senior Certificate		NCV
		HG	SG	
English (Home Language)	3 (40-49%)	E	C	50%
OR English (1 st Additional Language)	4 (50-59%)	n/a	n/a	n/a
Mathematics	3 (40-49%)	E	C	50%
OR Mathematical Literacy	6 (70- 79%)	n/a	n/a	n/a
Two 20 credit subjects (Life Orientation or more than one additional language is excluded)	3 (40-49%)	n/a	n/a	(a) At least 50% in one fundamental subject, in addition to English & Mathematics. (b) At least 60% in three compulsory vocational subjects

Note: This requirement represents the minimum and students will be ranked according to a points system based on the rating code in General Rule 7

4.4.2 Diploma in ICT in Applications Development (4-year Foundation) ITFI

In addition to the requirements of the General Rules (Rules G7 and G21 (b)), the minimum entrance requirement is a national Senior Certificate (NSC) or Senior Certificate (SC) or a National Certificate Vocational (NCV) that is valid for entry into a Diploma and must meet the following requirements:

Compulsory Subjects		NSC Rating	Senior Certificate		NCV
			HG	SG	
OR	English (Home Language)	3 (40-49%)	E	D	50%
	English (1 st Additional Language)	3 (40-49%)	n/a	n/a	n/a
OR	Mathematics	3 (40-49%)	E	D	50%
	Mathematical Literacy	5 (60- 69%)	n/a	n/a	n/a
Two 20 credit subjects (Life Orientation or more than one additional language is excluded)		3 (40-49%)	n/a	n/a	(a) At least 50% in one fundamental subject, in addition to English & Mathematics. (b) At least 60% in three compulsory vocational subjects

In addition a combination of alternative access and placement tests may be administered to gauge the level of preparedness for the academic demand of the programme.

Note: This requirement represents the minimum and students will be ranked according to a points system based on the rating code in General Rule 7

4.4.3 Masters in Information and Communications Technology (MICTI)

ITMI In addition to Rule G24 the following shall apply:

The applicant must have been awarded an Honours Degree or Post Graduate Diploma in ICT or equivalent or the applicant must have been awarded a BTech: IT or equivalent.

4.4.4 Doctor of Philosophy in Information Technology (DPINF1)

ITPI In addition to Rule G25 the following shall apply:

The candidate must have been awarded a Master's Degree in ICT or equivalent.

5. PROGRAMME RULES

5.1 ITG1 UNSATISFACTORY ACADEMIC PROGRESS

The DUT general rules G17* and G19* – G25* apply.

5.2 ITD2 PROGRESSION RULES

In addition to Rules G14*, G16*, G17* and G21* the following is applicable:

End of Year	Minimum Credits
1	50
2	120
3	200
4	280

- The student shall pass and accumulate the minimum number of credits at the end of each year of registration, as indicated in the table above
- This gives the student five years to complete the three year qualification **without** intervention as required within DUT general rules G17* and G21*.
- At the end of any year, if the student has not met the progression rules, he/ she may appeal.

5.3 ITG2 RE-MARKING OF PRACTICAL EXAMS

Students may apply for re-marking of practical examinations where the examination script is stored on electronic media.

5.4 ITG3 INTERRUPTION OF STUDIES

Should a student interrupt their studies by more than three (3) years, the student will be required to prove currency of appropriate knowledge prior to being given permission to re-register.

5.5 ITG4 ASSESSMENT RULES

Course marks are awarded for written (or oral) tests and assignments during the academic year. The number and duration of subject tests are set out in the subject study (learner) guides issued to students at the first lecture.

5.6 ITG5 COURSE MARK WEIGHTING

The weighting of Course mark versus Exam mark for examinable subjects offered by the Department of Information Technology is 40/60.

5.7 ITG6 GENERAL EDUCATION SUBJECT RULES

The General Education component is compulsory and covers 30% of the total credits of an under-graduate diploma and degree programme. These module offerings and its pre-requisites may be found in section 6.

5.8 ITG7 PHASE-OUT SUBJECT RULES

Phase out subject offerings may not be offered on both full-time and part-time basis.

5.9 ITG8 PART-TIME SUBJECT RULES

Part time students may have to write tests and/or examinations during full-time (normal working hours).

6. PROGRAMME STRUCTURE (New programme offerings)

6.1 Diploma in ICT in Applications Development

Year 1 – Semester 1

Code	Subjects	Core/ Fundamental/ General Education	Assessment Method	NQF Level

7. SUBJECT CONTENT ABRIDGED SYLLABI (New programme offerings)

Applications Development 1A

Introduction .Net Platform
Introducing the C# Programming Language
Getting start with .Net developing using C#
Language Essentials
Expressions and Operators
Primer on Types and Objects
Simple Flow Control
Basics of Exception and Resource Management
Introduction Types
Methods
Introduction To Unit Testing

Applications Development 2A

Introduction to ASP.NET MVC
ASP.NET MVC in Detail
Session Hijacking
Cross Site Request Forgery / SQL Injection
Using the MVC Framework Securely

Applications Development 3A

Introduction to Azure Features and Services
Scalability, Fault tolerance, Security
Uploading and testing Azure applications
Developing Azure Applications with Visual Studio
Saving data with Azure blob storage
Storing structured data using Azure table
Migrating ASP.NET Applications to Azure
Customizing Web Forms security for Azure
Enabling ASP.NET sessions and profiles for Azure

Applications Development Project 1

Structure of Report
Basic Research Methodology
Project Presentation

Applications Development Project 3A

Identify the expected outcomes of the project.
Provide a well-documented description of the problem to be addressed and why it is important.
Indicate the expected outcomes of the project, preferably in measurable terms.
List key personnel who will work on the project and include their cv's.
Describe how long (days, months) specific tasks or components of the project will take.
Show the annual and overall cost of the project. A detailed budget should be divided into categories such as salaries, fringe benefits, travel, supplies, equipment, etc.
Construct a plan of action for how the objectives will be achieved.
Draw up a checklist that provides the means to determine if the project has accomplished its objectives.

Applications Development 1B

Fields, Properties & Indexers
Constructors and Finalizers
Operators, Overloading and Conversions
Object Oriented Programming
Generic Types and Methods Collection Types
Delegates
Events
Language Integrated Query Essentials
Exceptions
Working With IO

Applications Development 2B

Filters, Controller Extensibility, Views
Model Templates, Model Validation
Unobtrusive Ajax, JQuery
Security and Vulnerability
Authentication and Authorization Deployment

Applications Development 3B

Building Service-Oriented Azure Applications
Building interoperable Azure services
Leveraging Azure for Asynchronous Computing
Implementing queue storage for messaging
SQL Azure Cloud-Based Storage
Migrating to a SQL Azure database
Controlling access using AppFabric

Applications Development Project 2

Planning and Analysis: Documents and Presentation
Design: documents and Presentation
Implementation and Testing
Applications must include the use of either a relational model database server or an object-relational database.
Examples of these database servers are:
Oracle, MS SQL/ MY SQL , DB4objects
All applications must be developed as either web/mobile based and designed for the use of Asynchronous JavaScript and XML (Ajax) Technology

Applications Development Project 3B

Understanding and application of concepts in application development
Application Development Methodology: Agile/Scrum, Waterfall, RAD, etc. Introduction to Project Management
The project management and Information Technology Context
The project management process groups
Project Integration Management
Project Scope Management
Project Time Management
Project Cost Management
Project Quality Management
Project Human Resource Management

Business Analysis 2A

Framework for Business Analysis and valuation using financial statements

Strategy Analysis

Implementing Accounting Analysis

Financial Analysis

Forecasting

Valuation Theory and concepts

Valuation Implementation

Business Analysis 3A

An in-depth study in object-oriented systems analysis and design and UML

Role of the Business Analysis Consultant

Application of UML diagrams in business scenarios

Case studies

Compile and execute a test plan to validate an ICT solution

Business Analysis Project 1

Structure of Report

Executive Summary: Write this last. It's just a page or two of highlights.

Company Description: Legal establishment, history, start-up plans etc.

Product or Service: Describe what you're selling. Focus on customer benefits.

Market Analysis: You need to know your market, customer needs, where they are, how to reach them, etc.

Strategy and Implementation: Be specific. Include management responsibilities with dates and budget.

Management Team: Include backgrounds of key members of the team, personnel strategy, and details.

Financial Plan: Include profit and loss, cash flow, balance sheet, break-even analysis, assumptions, business ratios, etc.

Basic Research Methodology Project Presentation

Business Analysis Project 3A

Identify the expected outcomes of the project.

Provide a well-documented description of the problem to be addressed and why it is important.

Indicate the expected outcomes of the project, preferably in measurable terms.

List key personnel who will work on the project and include their cv's.

Describe how long (days, months) specific tasks or components of the project will take.

Show the annual and overall cost of the project. A detailed budget should be divided into categories such as salaries, fringe benefits, travel, supplies, equipment, etc.

Construct a plan of action for how the objectives will be achieved.

Draw up a checklist that provides the means to determine if the project has accomplished its objectives

Business Analysis 2B

UML as the Tool

Business Analysis Planning and Monitoring

Plan the execution of business analysis tasks

Update or change the approach to business analysis as required

Assess effectiveness of and continually improve business analysis practices

Enterprise Analysis

Identify and propose projects that meet strategic needs and goals.

Elicitation

Explore, identify and document stakeholder needs.

Requirements Analysis

Progressively elaborate stated requirements to sufficient level of detail that accurately defines the business need within specified scope

Validate requirements meet the business need

Verify requirements are acceptable quality

Solution Assessment and Validation

Assess solutions to ensure that strategic goals are met and requirements are satisfied using different methodologies viz. agile, waterfall, incremental, SDLC, etc.

Requirements Management and Communication

Business Analysis 3B

SAP as the Tool

Using IT for process management and improvement

Business process improvement and modeling software

Tools of business process simulation

ERP systems

Use cases

Organizational issues in business process management

Understanding the customer

Business process outsourcing

Managing processes that cross organizational borders

Case Studies

Business Analysis Project 2

Strategies for creating a Portfolio of evidence

Creating a Portfolio of Evidence for a Business related problem

Presentation of a Research based Report

Overview of Feasibility study, requirements analysis and Specification Business

Business Analysis Project 3B

Understanding and application of concepts in business analysis Presentation / display skills

Developing a Business Case/Structure of a Business Case and Presentation of Business Case

Business Fundamentals I

Efficiently manage key aspects of academic life
Basic business communication, written and verbal
Information Literacy
Basic Business Finance
Critical Citizenry in a business environment

Business Information Systems I

Basic Concepts- an introduction to business information systems
Selection of appropriate hardware for a BIS
Selection of appropriate software for a BIS
Networks, telecommunications and the Internet as related to a BIS
Enterprise and functional BIS

Business Information Systems 3A

Information systems strategy
Information systems management
Managing information security
Providing end user services
Ethical, legal and moral constraints on information systems

Communication Networks I

Introduction to Networking,
Networking fundamentals Networking
Media
Cabling Testing, Cabling LANs and WANs
Ethernet Fundamentals & Technologies
OSI/TCP/IP network model
TCP/IP & IP Addressing
Routing Fundamentals and Subnets
TCP/IP Transport & Application Layers
CASE STUDY--Structured Cabling

Computer Applications in Business and Finance 2

Application Installation
End user functionality of the different modules in the application
Accessing an existing database
Input-process-output
Generate end user reports
Security features of the applications

Business Fundamentals 2

Introduction to research methodology (research terms and concepts e.g. qualitative; quantitative; research ethics; types of research)
Business Communication
Societal consequences of technological developments
Appropriate technologies for business practices
Current social issues (Energy, Health and Agriculture)

Business Information Systems 2

An introduction to acquiring and developing BIS
Initiating systems development
BIS project Management
Systems Analysis
Identifying the requirements
Focus on requirements determination in a lean or agile environment
Documenting the findings
Focus on soft systems methodology
Software tools for systems analysis
Case study
Systems Design
Aims of Design
Constraints on system design
The relationship between analysis

Business Information Systems 3B

The Internet, Intranets, and Extranets
E-commerce
Global Information Systems
Enterprise Systems
Management Support Systems
Intelligent Information Systems
Emerging Trends, Technology and Applications

Community Engagement project

The principles of community engagement.
Working in groups (being an effective team player).
Guidelines for undertaking a community engagement project.
The community as a main factor in community engagement.
Skills for community engagement.
Ethical issues in community engagement.
Planning a community engagement project.
Implementing a community engagement project. Evaluating a community engagement project.

Cornerstone 101

The module content will be developed around the concept of journeys, across time, across space, and across human relationships. It will take the journey of the UMgeni River (which is close to all DUT campuses) as a metaphor bringing different disciplinary perspectives to this content-environmental, historical and sociological in particular.

The metaphor of the journey will be sustained across the module and will be applied to personal journeys, historical, political and environmental journeys, and social journeys, with a specific focus on gender. Each section will draw in issues of ethics, diversity and critical citizenry. The design team may later take a different metaphor or theme, but with the same outcomes and attributes.

At each stage of the module, activities such as weekly online journey and class discussion will involve reflection and build communicative practices. There will be concluding section in which students will identify their learning and examine the implications for their roles as students and as citizens.

Financial Accounting I

Basic concepts in accounting

Transactions

Ledger accounts

The accounting cycle

Trial Balance

Presentation and disclosure of financial statements

The adjusting and closing process

Applications of accounting systems

Receivables and payables

Inventories

Cash equivalents

Non-current assets

Human Computer Interaction

Database systems

The Database Approach

Database Development Process

Database Alternatives

Database Models

Relational Models Characteristics

Database Design

Data Modelling with Entity Relationship Diagrams

Data Modelling Advanced Concepts

Introduction to Structured Query Language

Data Definition Commands

Data Manipulation Commands

Select Queries

Additional Data Definition Commands

Additional Select Query Keywords Basic Database Table Joins

Entrepreneurial Spirit

Orientation to Entrepreneurial Spirit (Course Expectations)

Spirit of Entrepreneurship

Operations

Project Management

Team Management

Business and Finance

Investigating the Business Environment/Architecture

Financing (Cost and Profit analysis, projected pro-forma statements, budgets, Working Capital Management and Capital

Budgeting) outcome 4

Marketing (Advertising, Promotions etc.)

Risk Management

Entrepreneurial Case study Analysis (Creativity enhancement)

ICT Enablers (Excel, social media, M&E commerce)

Fundamentals of Computer Security

Basic Security Principles & Terms

Computer System Security

Network Security

Internet & Email Security

Application Security

Human & Physical Security

User Security

Malware

Law, Ethics, & Privacy

Policies/Procedures & Documentation

Basic Cryptography

Best Security Practices

ICT Literacy and Skills

Basics of ICTs Hardware, Software, and Users

Internet Search

Word Processing

Spreadsheets

Presentations

Referencing

Security, Legal, Ethical, and Societal Issues

Economics of ICTs

Information Management 2A

Database systems

The Database Approach

Database Development Process

Database Alternatives

Database Models

Relational Models Characteristics

Database Design

Data Modelling with Entity Relationship Diagrams

Data Modelling Advanced Concepts

Normalizing Database Designs

Introduction to Structured Query Language

Information Management 2B

Advanced Structured Query Language
Implementation Alternatives Database Management

Information Systems 2A

Essentials of Design and the Design Activities
Designing the User and Systems Interfaces
Object oriented design principles
Object oriented design: Use Case realization
Database, Controls, and Security Making the system Operational

Information Systems 3A

The Scope of Software Engineering
The Software Process and its Attendant Problems
Software Life-Cycle Models
Software Quality Assurance
Current Trends in Systems Development

IT Logic & Technology 1A

Computer Technology Concepts
Logic skills & Problem solving techniques
Pseudocode with variables and constructs
Problem solving with puzzles
Critical Reasoning – logic
Deductive and Inductive reasoning
Problem solving using pseudocode, trace tables
Input, Process, Output
Simple Algorithms
Flowchart

IT Logic & Technology 1 B

Structured algorithms
Flowcharts
Trace tables
Introduction to Compiler, programming language
Loops
Arrays

IT Logic & Technology 2A

Introduction to Programming
Levels / generations of Language
Explore different Software Packages
Introduce Programming Tool
Syntax – Variable
Decision constructs
Repetition constructs

Information Systems I

An Overview of systems analysis and design
The role of the systems analyst
Investigating systems requirements
Use Cases
Domain Modelling
Extending the Requirements models
Project planning and Project Management

Information Systems 2B

The Software life cycle models
Software Security
Software Maintenance
Agile development using SCRUM as a tool
History of agile methods
Philosophy of agile methods

Information Systems 3B

Fundamentals of Software Testing
Ensuring Testing throughout the Software Life Cycle
Recognizing key concepts in maintenance testing
Comparing the four test types
Coping with the psychology of testing
Implementing Static Analysis Techniques
Leveraging Test-Design Techniques
Differentiating various "specifications"
Applying specification-based techniques
Utilizing structure-based techniques
Deploying experience-based knowledge
Test Management, Structuring a test plan
Interpreting a test summary report
Managing incidents, Addressing project and product risks
Implementing Configuration Management (CM)
Defining the functions of CM
Evaluating objectives of CM
Adopting Test Support Tools

IT Logic & Technology 2 B

Methods
1D arrays
Objects and classes
GUI interface
Problem Solving using a programming tool

IT Project Management

Backdrop: The Science of Scrum
New Management Responsibilities
The Scrum Master
Bringing Order from Chaos
The Product Owner
Planning a Scrum Project
Project Reporting— Keeping Everything Visible
The Team
Scaling Projects Using Scrum Rules

Law for Life

Introduction
Civil and criminal law
Law of insurance
Road accident fund
Law of contract
Marriage
Succession

Mobile Computing 2A

Overview of Mobile technologies and platforms
Basic User Interface design
Advanced **User** interface Design
Working with Files and Directories
Understanding Protocol Independent Multicast
Technology
Mobile Internationalization
Generic connection framework
Text and multimedia messaging
Sending and receiving messages (binary and multipart)

Operating Systems

Introduction
Multi-Programming
Concurrency
Memory Management Device Management
File Systems
Inter process Communication
Network Organisation Concepts
Management of Network Functions

Skills Development I A

Academic Literacy
Information Literacy
Language Skills
Numeracy

Skills Development 2 A

Basic Accounting Skills Accounting concepts
Basic Business Skills

Theory of ICT Professional Practice 3

Organizational structure
Communication Skills
Responsibility of the computer professional
Skills of ethical analysis
Elements of social analysis
Professional Ethics and Social Responsibility

Me, My World, My universe

The module will be developed within the context of decision making and consequences of these on the self, the world and the universe.

The module will start with a “refresher” on the appropriate mathematical computations and solving of simple, single context applications in the following areas of mathematics:

Numbers and Operations, Functional Relationships.
Space, Shape, Measurement and Data handling

Broader issues involving the quantitative literacies/reasoning will be addressed by examining relevant/current case studies within the themes indicated above. Not all themes maybe addressed in a particular year. But at least two issues will be analysed and discussed from a quantitative reasoning perspective.

Mobile Computing 2B

Wireless Devices and Services
XML and Web Services
Session Initiation Protocol
Responses
Multimedia
Advanced Multimedia
Security and transactions Smartcards? Really?
Testing SATSA Applications with the Emulator Basic
Smartcard Communication
Smart Card Communication with Java Card RMI
Generating Signatures
Managing Certificates
Cryptography

Skills Development I B

Business English
Communication
Life Skills

Skills Development 2 B

Business Processes
Enterprise Systems Knowledge for Business
Sales processes
Purchasing processes
ERP foundation scenarios using SAP

Theory of Internal Auditing

Basic introduction to Internal Auditing
The role of the internal auditor
Basic audit concepts internal control
Elementary systems of internal control
Evaluation of internal control system cycles internal audit reports

8. PROGRAMME INFORMATION (*Current programme offerings*)

8.1 GENERAL

Student attendance

The department does not hold itself responsible for the recording of attendance of its students.

Conduct of students in laboratories

Rules of conduct pertaining to the specific laboratory as instituted by the head of the department, shall apply to all students registered for that subject.

- Eating, playing music, smoking or drinking in any lecture venue or laboratory is forbidden.
- Safety rules are to be strictly adhered to at all times.
- Mobile phones are to be switched off during lecture, laboratory and assessment sessions

Course/ year marks

- With reference to Rule G15, the calculation of the year/semester mark for each subject will be indicated within the learner guide of each subject.
- In addition to the general requirements for a year mark as stipulated in Rule G15 the department reserves the right to recommend at the end of a reasonable portion of the course that a student withdraw from the course, either due to poor performance in the majority of subjects, or due to inadequate presentation of assigned work.
- A year/semester mark is valid only for the main examination in the year/semester in which a student is registered, plus the supplementary examination in that subject, if granted to the student in terms of Rule G16.

8.2 DEGREE PROGRAMMES

8.2.1 BTECH: Information Technology (Software Development)

This instructional programme will have a final intake of new students in 2019 (numbers permitting).

Normal duration

1 year full time or 2 years part time

8.2.2 BTECH: Financial Information Systems

This instructional programme is an annual programme run over two year's part time.

This programme will have a final intake of new students in 2018 (number permitting). Insufficient student numbers may result in the programme *not* being offered.

Normal duration

2 years part time

8.3 MINIMUM ADMISSION REQUIREMENTS

8.3.1 Bachelor of Technology in Information Technology (BTECH: IT)

A student may register for the B Tech: Information Technology provided that the student has:

- Successfully completed the National Diploma: Information Technology (Software Development). This includes the completion of the prerequisite subjects Technical Programming 2 (or equivalent) and Development Software 3 (project) or its equivalent.
- Obtained an average of 60% or greater for third level subjects or has at least two years appropriate industry experience.
- In exceptional cases, variations in these requirements shall be considered by the Head of Department.

8.3.2 Bachelor of Technology in Financial Information Systems (BTECH: FIS)

A National Diploma or University Degree with Financial Accounting III and Financial Information Systems III or the equivalents. In exceptional cases, variations in these requirements shall be considered by the Head of Department.

8.4 PROGRAMME RULES (B TECH IT AND B TECH FIS)

Slow progress

A student who is unable to graduate within the allowed time period will be given a warning of slow progress.

Re-admission

After the first year of study a student has to have successfully passed 50% of the registered subjects in the B Tech Degree in order to re-register for the programme.

Appeals

Students may appeal for registration through the student portal.

8.5 PROGRAMME STRUCTURE

8.5.1 Bachelor of Technology in Information Technology (BTECH: IT)

The programme shall consist of 10 modules completed during one year of fulltime study or two years part-time study. Project 4 counts as 2 modules. The offering of each module / instructional programme will be subject to availability of resources. In order to qualify one of the modules is required to be completed at advanced level e.g. Advanced Development Software 4. Students are responsible for selecting subjects in order to qualify for graduation.

FULL TIME - STUDY PERIOD I

Code	Subjects	*C/O	Semester/ Year	Assessment Method	NQF Level	Pre- requisite	Co- Req.
DBSY404	Database Systems 4	C	Semester	Exam	7		
DSFW401	Development Software 4	C	Semester	Exam	7		
INTM401	Information & Technology Mgt 4	C	Semester	Exam	7

8.6 ABRIDGED SYLLABUS (Current BTECH programme offerings)

ADVANCED DEVELOPMENT SOFTWARE 4

SAPSE Code 60704606
Subject Code ADSW401

Theory

Advanced Java Programming Data Structures Java
Design Patterns and/or Graphical Applications

Practical:

Practical work shall consist of tutorials, assignments and a group project.

ARTIFICIAL INTELLIGENCE 4

SAPSE Code 69900706
Subject Code ARIN402

Theory

Not currently offered.

Method of Evaluation:

Course mark - 40%; Exam mark - 60% (one three hour exam)

DEVELOPMENT SOFTWARE 4

SAPSE Code 60703706
Subject Code DSFW401

Theory

Advanced Data Structures
Advanced Programming Techniques with Java programming

Practical:

Practical work shall consist of tutorials and assignments.

EXPERT SYSTEMS 4

SAPSE Code 69900606
Subject Code ESYS401

Theory

Knowledge Representation and Acquisition
Knowledge Engineering
Building Expert Systems
Inferences, Explanations and Uncertainty
Uncertainty in Expert Systems
Software Evaluation in Expert Systems Fuzzy Logic

Practical:

There will be some Expert System development using shells.

Method of Evaluation:

Course mark 40% and Exam mark 60% (One three hour paper).

ADVANCED MANAGEMENT COMMUNICATION SKILLS 2

SAPSE Code 059901222
Subject Code AMCS201

Theory

Problem Solving
Conflict Management and Leadership
Negotiation
Organisational Communication
Job Application, Interviews, Business letter writing, Memos
Motivation and Persuasion
Advertisement
Meeting Procedures and Minutes of a meeting

Practical:

Power Point Presentations.
Oral Presentations

DATABASE SYSTEMS 4

SAPSE Code 60503306
Subject Code DBSY404

Theory

Database Background
The relational model and languages
Database analysis and design
Methodology
Selected database issues Business Intelligence

Practical:

Practical work shall consist of tutorials, assignments and a group project.

FINANCIAL MANAGEMENT IV MODULE I

SAPSE Code 040923106
Subject Code FNLM413

(Module I)

The role and environment of financial management. Time value of money.
Risk and return.
Valuation of capital assets (bonds and shares)
Dividend Policy
Analysis and interpretation of financial statements

Method of Evaluation:

Course mark - 40%; Exam mark - 60% (one three hour exam)

FINANCIAL INFORMATION SYSTEMS IV

SAPSE Code 060504006

Subject Code FISY401

Theory

The theory covered in Research Methodology is applied. As there is no contact time, students are required to apply sound research principles to complete a proposal and implement the research.

Practical:

None

Method of Evaluation:

NO EXAM. 100% Course Mark

FINANCIAL MANAGEMENT IV MODULE 2

SAPSE Code 040923106

Subject Code FNLM223

(Module 2)

Cost of Capital Capital Budgeting.

Sources of Finance

Working Capital Management

Mergers and Take-overs

International managerial finance

FUNCTIONAL MANAGEMENT

SAPSE Code 040926212

Subject Code FNMT101

Theory

Managers and Management

The Historical Roots of Contemporary Management

The Management Environment

Foundations of Planning

Foundations of Decision-Making

Basic Organization Designs

Managing Change, Stress, and Innovation

Motivating and Rewarding Employees

Leadership and Trust

Communication and Interpersonal Skills

Foundations of control

NETWORKS 4

SAPSE Code 60301906

Subject Code NETW404

Theory

Top-down approach to Computer Networking

(featuring the Internet)

Advanced topology and design issues relating to TCP and UDP.

Network Protocols (HTTP, FTP, SMTP, DNS)

In-depth study of the five Internet layers, viz. Application, Transport, Network, Link and Physical.

Advanced network issues: Delay, Congestion, Reliability, Routing (algorithms), Security, Wireless and mobile networks, and network management.

Practical:

One project to cover the practical aspects of networking.

Method of Evaluation:

Course mark 40% and Exam mark 60% (One three hour paper).

INFORMATION AND TECHNOLOGY MANAGEMENT 4

SAPSE Code 060207106

Subject Code INTM401

Theory

Managers and Management

The Historical Roots of Contemporary Management

The Management Environment

Foundations of Planning

Foundations of Decision-Making

Basic Organization Designs

Managing Change, Stress, and Innovation

Motivating and Rewarding Employees

Leadership and Trust

Communication and Interpersonal Skills Foundations of control

Method of Evaluation:

Course mark 40% and Exam mark 60% (One three hour paper).

INFORMATION SECURITY 4

SAPSE Code 60705306

Subject Code INSC401

Theory

Data Encryption

Internet Security

Access Control

Software security

Security policies Legal issues

Practical:

Practical work shall consist of tutorials and assignments.

Method of Evaluation:

Course mark 40% and Exam mark 60% (One three hour paper).

INDUSTRIAL LAW

SAPSE Code 130306712

Subject Code INLW101

Theory

Intellectual Property Law

Labour Law

Computer-related Law

Practical:

None

Method of Evaluation: Course mark - 40%; Exam mark - 60% (one three hour exam)

OPERATING SYSTEMS 4

SAPSE Code 60801506

Subject Code OSYS404

Theory

Computer System & Operating System Overview

Process Description and Control

Threads, SMP and Micro Kernels

Concurrency: Deadlock and Starvation

Memory Management & Virtual Memory

Uni-processor Scheduling

Method of Evaluation: 100% Course Mark

PROJECT 4

SAPSE Code 69900206

Subject Code PRJT402

Theory

Theories and concepts relevant to the project are covered in the Research Methodology course (229900012)

Practical:

Practical work shall consist of the design and execution of a research project with the following research phases: proposal development, Implementation of the proposal, write up of findings, including literature review, data collection, analysis and discussion.

Method of Evaluation:

NO EXAM

100% Course Mark

The student's project will be evaluated by means of a proposal and research dissertation. Semester 1 and 2.

USER INTERFACES 4

SAPSE Code 60703206

Subject Code USRI401

Theory

Interface standardization

Computer graphics

Computer user interfaces

Input/output peripherals

Practical:

Practical work shall consist of self-study assignments.

Method of Evaluation:

Course mark 40% and Exam mark 60% (One three hour paper).

None

RESEARCH METHODOLOGY

SAPSE Code 229900012

Subject Code RMIT101

Theory

Research methods aim to equip the student with the basic skills to do academic research. It is a compulsory prerequisite for MTECH studies. Topics such as research approaches, methods and data collection methods are covered. The assessment of the subject consists of tests, assignments and a full proposal. It is an annual subject with contact time during semester 1 and the development of the proposal during semester 2.

Method of Evaluation:

NO EXAM. 100% Course Mark

NB: Students to read this section in conjunction with the relevant learner guides.

SOFTWARE ENGINEERING AND DESIGN 4

SAPSE Code 60705106

Subject Code SWED401

Theory

Intro to Software Engineering

Revision of classic process models

Agile process models

IT project management frameworks

Software quality frameworks

Requirements engineering

Systems methods in software analysis

Cost estimation

Software architectural design

Software team organization

Method of Evaluation:

Course mark 40% and Exam 60%

9. PROGRAMME INFORMATION (Phase-out programme offerings)

9.1 GENERAL

Student attendance

The department does not hold itself responsible for the recording of attendance of its students.

Conduct of students in laboratories

Rules of conduct pertaining to the specific laboratory as instituted by the head of the department, shall apply to all students registered for that subject.

- Eating, playing music, smoking or drinking in any lecture venue or laboratory is forbidden.
- Safety rules are to be strictly adhered to at all times.
- Mobile phones are to be switched off during lecture, laboratory and assessment sessions

Course/ year marks

- With reference to Rule G15, the calculation of the year/semester mark for each subject will be indicated within the learner guide of each subject.
- In addition to the general requirements for a year mark as stipulated in Rule G15 the department reserves the right to recommend at the end of a reasonable portion of the course that a student withdraw from the course, either due to poor performance in the majority of subjects, or due to inadequate presentation of assigned work.
- A year/semester mark is valid only for the main examination in the year/semester in which a student is registered, plus the supplementary examination in that subject, if granted to the student in terms of Rule G16.

9.2 DIPLOMA PROGRAMMES

9.2.1 National Diploma in Information Technology (Software Development)

The National Diploma in Information Technology had TWO STREAMS on offer for students to choose from upon admission, depending on their area of interest and aptitude. The Streams were:-

National Diploma in Information Technology (Software Development)

NDINSI

AND

National Diploma in Information Technology (Business Applications)

NDINBI

The **Software Development** stream provides students with computer software development skills as well as theoretical and practical grounding for work in the information technology sector as dictated by industry needs.

Career Opportunities:

Software developers, Analyst/Programmers, IT Managers, Information systems specialists with numerous entrepreneurial opportunities.

The **Business Applications** stream covers Enterprise Resource Planning (ERP) systems. Topics include integration of business processes and transactions in ERP. The University, being an active member of the SAP University Alliances (UA), uses the SAP software as the training tool in the course for students to gain insights into the best practices on how information can be leveraged to optimize the integration of business processes for improved business performances.

Career Opportunities:

Analyst/Programmers, Business Analysts, Information systems specialists with numerous entrepreneurial opportunities.

Normal duration

Minimum 3 years full time or minimum 4 years' phase-out part time

9.3 PROGRAMME RULES

Progression rules for ND: IT, ND: FIS and FOUNDATION programme

A student needs to be aware of the last possible semester of registration for phase-out modules. (Refer to pages 39 and 41 respectively)

9.4 PROGRAMME STRUCTURE

NATIONAL DIPLOMA: Information Technology

(Software Development - 1st Year) – PHASED OUT FOR 2016

9.5 SUBJECT CONTENT ABRIDGED SYLLABI

Business Analysis 2

Module 1 and 2

The module focuses on an introduction to business concepts. It entails the use of Enterprise Resource Planning (ERP) software programs which manage companywide business processes using a central database.

Describe how ERP systems can solve the problems in accounting in disintegrated systems.

Describe Enron scandal affected accounting information systems.

Use similar South African examples.

Explain accounting and Management reporting benefits from ERP systems.

Method of Evaluation:

Course mark 40% and Exam mark 60% (One two hour paper).

Commercial Programming I (60702512) (Annual)

Commercial Programming I is a 3rd year course that covers database design and interaction, using the Oracle product.

You will learn how to create relational tables, how to create relationships and how to manipulate the data in a database.

Some Oracle specific functions will also be covered. You will be exposed to SQL & PL/SQL, in order to implement the concepts taught. Since Oracle is a programming tool and language, the practical component forms a crucial aspect in the course. This course should be studied in conjunction with

Information Systems 3, as both courses deal with Databases and SQL programming code. You will be required to apply your knowledge gained in Information Systems 2 to the database programming being covered and will need to have good programming knowledge to cope with the PL/SQL component.

Method of Evaluation:

NO EXAM, 100% Course Mark

Development Software I (Visual C#) (60702312)

Module 2 (DSFW122)

The "visual aspects" of Visual C# Web Application

Methods

Debugging

String Manipulation

XML

Multiple web pages, Hyperlinks

Classes and Objects

Practical:

Extensive use of problem solving & OOP by solving problems using Visual C#.

Method of Evaluation:

Course mark 40% and Exam 60 % (One two hour paper).

Business Analysis 3

Module 1 and 2

Educate Learners on manufacturing terminology, concepts, and strategies related to demand management, procurement and supplier planning, material requirements planning, capacity requirements planning, sales and operations planning, master scheduling, performance measurements, supplier relationships, quality control, and continuous improvement.

Increase functional knowledge of production and inventory management.

Improve efficiency across the processes of an organization's supply chain.

Streamline operations through accurate forecasting.

Predict outcomes more accurately.

Maximize customer satisfaction by delivering products and services Just-in-Time.

Increase profitability by optimizing an organization's inventory investment.

Method of Evaluation:

Course mark 40% and Exam mark 60% (One two hour paper).

Development Software I (Visual C#) (60702312)

Module 1 (DSFW112)

Introduction: Computers

Computers: Components, Types, Uses, etc.

Discuss Software: OS (or SS) and Application S/W

Introduction: Programming

Overview of the .Net Platform

Procedural programming vs OOP

Program Development Cycle (Analyze, Design, Code,

Test, Document, Maintain)

Structured Programming Techniques

I.P.O, Flow Charts, Trace Table

Overview of the .Net Platform

Variables: Naming, Declaration, Initialization, Scope Data

Types: Integral, Floating, Bool, Char, String, Constants, etc.

Operators: Assignment, Relational, Logic, and Arithmetic

Introduction to C# (Web Application)

Decision/Selection Structures

Looping/iteration/repetition

Practical:

Extensive use of problem solving using algorithms and Visual C#.

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper).

Development Software 2 (60702722)

The Development Software II course aims to integrate theory and practical components of Web based database systems using an object oriented approach to development. Learners are exposed to advanced development concepts and given simulated problems allowing them to use their programming skills to solve these problems.

Module 1

To become familiar with Web based programming using the Visual Studio .NET Framework components and the C# language. Use ASP.NET web controls to design information systems with a user-friendly Graphical User Interface (GUI). Design information systems that adhere to the object oriented programming paradigm.

To develop knowledge of SQL Server.

Design and develop information systems that facilitate the management of data stored in a SQL Server database. Enforces the features and benefits of the ADO.NET data access model and its' components.

Practical:

Practical work shall consist of tutorials, assignments and a group project.

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper).

Module 2

Design and develop applications built around a 3-tier application paradigm.

Use advanced ASP.NET web controls, web forms and ASP.NET data controls.

Creating ASP.NET custom controls and using those controls in an ASP.NET application.

Setting up ASP.NET Membership Provider for an application.

Creating an ASP.NET application to send email.

Create and consume Web Services.

Caching objects to improve performance in ASP.NET.

Deploying web applications using Visual Studio and Internet Information Server.

Practical:

Practical work shall consist of tutorials, assignments and a group project.

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper).

Information Systems I (60503612) – Phased Out- Final offering 2016

Module 1

Introduction to Computers, the internet & WWW Application Software

Components of the system unit

Input and Output, Storage

Operating systems and utility programs

Practical:

Practical work shall consist of an in-depth study, and hands-on training on the use of Presentation, Word Processing and Spreadsheet software packages, (Assignments are given to cover all aspects of these packages).

Development Software 3 (60702803) (Annual)

The Development Software 3 course integrates various theory and practical components that a learner would have been exposed to during the course of the diploma. The course achieves this through the use of a work integrated learning project. Students are required to obtain non-trivial exposure to the real working world by attempting to solve software problems in the retail, services, manufacturing, government and small business sectors.

The ultimate objective is for each student to experience the complete design and development of a real-life information system. The course includes an agile project management component that provides the foundation for students to administer and manage their projects successfully.

Method of Evaluation:

NO EXAM

100% Course Mark

Financial Accounting I (0401092120)

Module 1

Financial Reporting as specified in AC000

Identify overall objectives of Financial Reporting

Define elements of financial statements related to measurement

Define and advise the qualitative characteristics of financial information

Identify and apply recognition and measurement Explain the need for a conceptual framework

Explain the meaning of GAAP Prepare basic financial reports

Practical:

Practical work shall consist of tutorial and self-study assignments on all sections of the syllabus.

Method of evaluation:

Year Mark 40% and one examination of 3 hours 60% = 100%

Financial Accounting I (0401092120) Module 2

Statement of Changes in equity:

Sole Trader - changes in capital

Partnership

Close Corporations

Company

Change in ownership:

Sole trader - dissolution of entity Partnership - entry and retirement

Close Corporations - entry of new member

AC Statements

AC101 / AC108 / AC123 / AC128

Practical:

Practical work shall consist of tutorial and self-study assignments on all sections of the syllabus.

Method of evaluation:

Year Mark 40% and one examination of 3 hours 60% = 100%

Module 2

The World of the Systems Analyst
Approaches to System Development
Structured Systems Analysis Structured
Systems Design

Practical:

Practical work shall consist of an in-depth study, and hands-on training on the use of Databases software packages and CASE tool software packages (Assignments are given to cover all aspects of these packages).

Method of Evaluation:

Course mark 40% and Exam mark 60% (One two hour paper).

Information Systems 2 (60502122)

Module 1

Introductory concepts: information and the organization
Methodologies for developing Information Systems in an object oriented approach
Tools and Techniques available for Systems Analysis

Practical:

Microsoft Projects (or a project management tool) and Microsoft Visio

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper-Semester I)

Module 2

Identification of alternatives Systems Design Database concepts and structures.

Practical:

Microsoft Visio

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper).

IT Logic and Technology 1

Introduction to Computers

ICDL

Problem-solving using pseudo code

Introduction to Programming

Logic skills

Mark-up Languages

Method of Evaluation:

NO EXAM, 100% Course Mark

IT Logic and Technology 2

Software Packages

Web 2 standards

HTML

Method of Evaluation:

NO EXAM, 100% Course Mark

Information Systems 3 (60502203)

Module 1

Introduction to software engineering Software engineering concepts

The software process

Classic process models

Agile process models

Software teams

Requirements engineering concepts

Software design concepts Web application design

Method of Evaluation:

Course mark 40% and Exam 60%

Module 2

Object-oriented databases

Database administration

Data Warehouses and Data Mining

Knowledge based expert systems

Practical:

This will consist of hands on work on Oracle MS SQL database system.

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper).

Information-Technology Skills (60502012)

Module 1

Communication Theory:

Interpersonal Communication

Meeting Procedure

Small Group Communication

Organisational Communication

Electronic Communication

Presentations Accounting:

The Business entity

Starting a business

The ledger - first glance

The accounting equation

Final accounts and balance sheet

Year-end financial statements

Method of Evaluation:

NO EXAM - 100% Course Mark

Module 2

Management:

The role of management

The role of IT management

Business processes in Finance, Marketing, Production, Personnel

The impact of IT on Business and Society

Starting your own business Developing a Business Plan Legal Aspects:

Labour Legislation in S.A

Legislation regarding Information and technology

Method of Evaluation:

NO EXAM - 100% Course Mark

Internet Programming 2 (60704122)

Web development, including:
HTML 4 leading onto XHTML
Cascading Style Sheets
Server side scripting language / MySQL

Practical:

Exercises are given to the student for all topics within the syllabus. These exercises are expected to be programmed on the computer.

Method of Evaluation: Course mark 40% and Exam mark 60% (One three hour paper).

Skills Development I

Academic Literacy
Information Literacy
Numeracy
Language skills
Life skills

Method of Evaluation:

Method of Evaluation:

NO EXAM, 100% Course Mark

Technical Programming I (60702412)

Module 1

Object Oriented programming techniques
Java Selection structures
Java Control Structures
Java methods

Practical:

Programming tasks to cover all topics in the syllabus. These must be planned, designed and tested on a computer

Method of Evaluation:

Course mark 40% and Exam 60% (One two and a half hour paper)

NB: Technical Programming Module 1 is a pre-requisite for Module 2.

Module 2

One Dimensional Arrays
String Methods and Manipulation
Object Oriented programming techniques Text Files

Practical:

Programming tasks to cover all topics in the syllabus. These must be planned, designed and tested on a computer

Method of Evaluation:

Course mark 40% and Exam 60% (One two and a half hour paper)

Systems Software 2 (60801322)

Module 1

Operating systems (advanced)
Method of Evaluation:
Course mark 40% and Exam 60% (One two hour paper)

Module 2

Network Fundamentals

Practical:

Tutorial and self-study group assignments with individual assessment

Method of Evaluation:

Course mark 40% and Exam 60% (One two hour paper)

Systems Software I (60801212)

Module 1/ Module 2

On completion of module 2 the learner will be able to:
Distinguish between the different types of networks
Demonstrate an understanding of the importance of network standards

Design a small network using their knowledge of network technologies

Practical:

Designing a LAN

Method of Evaluation:

Course mark 40% (Three tests) and Exam 60% (One two hour paper)

Technical Programming 2 (60704022)

Module 1

Object oriented programming

Practical:

Practical Programming to cover all topics in the syllabus. These must

be planned, designed and tested on a computer

Method of Evaluation:

Course mark 40% and Exam 60% (One practical examination with a minimum duration of two hours)

Module 2

Advanced GUI Programming

Practical:

Practical Programming to cover all topics in the syllabus. These must be well planned, designed and tested on a computer

Method of Evaluation:

Course mark 40% and Exam 60% (One practical examination with a minimum duration of two hours)

ABRIDGED SYLLABUS for ND: FIS

Business Calculations (150805212)

Basic mathematics
Summarising and analysing data
Index numbers

Financial Accounting Module 2

SAPSE Code 040137406
Subject Code FACC422

Theory

Interim Reporting
Operating Segments
Employee Benefits
Financial Instruments Borrowing
Costs

Practical:

None

Method of Evaluation:

Course mark - 40%; Exam mark - 60% (one three hour exam)

Communication (059900512)

Effectively apply communication principles to a variety of communication activities, contexts and resolving problems.
Demonstrate verbal and written communication skills

Cost Accounting II (040140522) Module 2

Demonstrate competency in the operation of process costing systems with equivalent units and normal and abnormal losses.

Demonstrate competency in the operation of process costing systems with joint and by products. Demonstrate competency in preparing income statements according to the direct and absorption costing methods.

Demonstrate the ability to use pricing decisions.

Demonstrate the ability to implement a Standard Costing, system.

Practical:

Practical work consists of tutorials and self-study assignments

Method of Evaluation:

Year Mark 40% and one examination of three hours 60%

Entrepreneurial Skills (40510912)

Develop an understanding of the basic business and economic principles by identifying and justifying the relationship between business and economic principles. The basic functions of the enterprise and how they relate.

Create, maintain and enhance a culture of entrepreneurship

Cost Accounting II (040140522)

Module 1

Administer an Integrated Accounting system and a Cost Ledger Accounting system.

Operate a basic job-costing system.

Administer contract accounts.

Draw up fixed, flexible and cash budgets.

Practical:

Practical work shall consist of tutorials and self-study assignments on all sections of the syllabus.

Method of Evaluation:

Year Mark 40% and one examination of three hours 60% = 100%

Commercial Law for Accountants I (130309912) Module 1

Understand the SA legal framework

Understand the rules relating to the Interpretation of Statutes

Understand and apply knowledge of principles relating to the Law of Contract

Understand the legal principles relating to Contract of Sale

Understand and apply knowledge of principles relating to the Law of Agency

Cost Accounting I (040140412)

Understand the basic principles of cost classification and terminology

Define and understand the different terms and concepts in respect of stock holding and administer different stock systems.

Administer remuneration systems.

Classification and analysis of overheads and allocation of overheads by means of predetermined rates.

Understand the cost flow in a manufacturing concern determine cost of manufactured products and services. Use the Cost-volume-profit analysis as a management tool

Practical

Practical work shall consist of tutorials and self-study assignments on all sections of the syllabus.

Method of Evaluation

Year Mark 40% and one examination of three hours 60% = 100%

Financial Accounting I (0401092120)

Module 1

Financial Reporting as specified in AC000

Identify overall objectives of Financial Reporting

Define elements of financial statements related to measurement

Define and advise the qualitative characteristics of financial information

Identify and apply recognition and measurement

Explain the need for a conceptual framework

Explain the meaning of GAAP Prepare basic financial reports

Practical:

Practical work shall consist of tutorial and self-study assignments on all sections of the syllabus.

Module 2

Statement of Changes in equity:

Sole Trader - changes in capital

Partnership, Close Corporations, Company

Change in ownership

Sole trader - dissolution of entity Partnership - entry and retirement

Close Corporations - entry of new member AC Statements, AC101, AC108, AC123, AC128

Practical:

Practical work shall consist of tutorial and self-study assignments on all sections of the syllabus.

Method of Evaluation:

Year Mark 40% and one examination of 3 hours 60% = 100%

Financial Information Systems I (FISY101) Information Systems I (ISYS103)

Theory

Overview of the computer and communication revolution

Information processing cycle

Computer software concepts

Information systems

concepts Impact of computers on society

Practical:

Practical work shall consist of an in-depth study and

hands-on training on the use of Word Processing,

Spreadsheets, Databases and

Presentation software packages (tutorials and assignments are given to cover all aspects of these packages), as well as a written report on a site visit done in conjunction with Systems Software I.

Method of Evaluation:

One 3-hour examination 50% and Year Mark 50% = 100%

Financial Accounting II (0401093220) (Module 1)

IAS 01 - Presentation of Financial Statements

IAS 01 - Inventories

IAS 18 - Revenue

IAS 10 - Events after the balance sheet

IAS 38 - Intangibles

IAS 37 - Provisions and contingencies

Practical:

Practical work shall consist of tutorial and self-study assignments

Computer applications

Method of Evaluation Year Mark 40% and two 3-hour examinations 60%

(Module 2)

IAS 01 - Presentation of Financial Statements

IAS 16 - Property, Plant & Equipment

IAS 36 - Impairments of Assets IAS 21 - Foreign exchange

IAS 07 - Cash Flow Statements

Practical:

Practical work shall consist of tutorial and self-study assignments

Computer applications

Method of Evaluation:

Year Mark 40% and two 3-hour examinations 60% = 100%

Financial Accounting III Module I

Identify overall objectives of financial reporting, the specific information needs of equity investors, and the general information needs of other users.

Define the elements of financial statements related to the measurement of financial position and performance and apply to the presentation of financial reports. Define and advise the qualitative characteristics financial information

Identify and apply recognition and measurement criteria to financial statements.

Explain the need for a conceptual framework and for standards of financial reporting.

Identify the statutory disclosure requirements, and explain the meaning of fair presentation

Earnings per share, leases and statements of cash flow

Method of Evaluation:

Year Mark 40% and two 3-hour examinations 60% = 100%

Module 2

Apply techniques to account for group financial statements and valuations

Incorporate changes in the form or capital structure (Liquidations and reorganization, mergers and acquisitions) of an Entity in the financial statements in accordance with the objectives to be achieved and the legal constraints. Demonstrate the purpose of financial reporting by applying analysis and interpretation techniques to financial statements

Method of Evaluation:

Year Mark 40% and two 3-hour examinations 60% = 100%

<p>Financial Information Systems 2 (FISY201) Information Systems 2 (ISYS203)</p> <p>Theory Introductory concepts: Information and the organisation Methodologies for developing Information Systems Tools and Techniques available for Systems Analysis Database concepts and structures, especially the Relational Database Practical: ORACLE Case and Microsoft Access</p> <p>Method of Evaluation: One 3-hour examination 50% and Year Mark 50% = 100% (Amended w.e.f. 2001/01)</p>	<p>Financial Information Systems 3 (FISY321) Module 2</p> <p>Theory Overview of analysis and design Object-orientated analysis Object-orientated design File systems and databases Transaction management and currency control Object-orientated databases Database administration Knowledge based expert systems</p> <p>Practical: This will consist of hands-on work on the Oracle database and the XI-PLUS expert system.</p> <p>Method of Evaluation: One 3-hour examination 50% and Year Mark 50% = 100%</p>
<p>Financial Information Systems 3 (FISY311)</p> <p>Module 1 (Offered in Semester 2) Subject Code FISY311 Financial information system 3 is a project management course which equips learners with the tools and techniques used in running a project from the initial stage to the closing stage. Introduction to Project management Project, Program, and Portfolio selection Project management knowledge areas Tools and techniques used in each knowledge area Project management process group Mapping the process group to the knowledge areas Project management best practices Project management profession</p> <p>Practical: Practical work involves the application of all the tools and technique to manage a project from the initiation to closure</p> <p>Method of Evaluation: Course mark - 40% and exam mark - 60% (one two hour exam)</p>	<p>Internal Auditing 1(040137312) Module 1 Basic introduction to Internal Auditing The internal auditor Control of the profession Basic introduction to auditing</p> <p>Internal Auditing 1(040137312) Module 2 Planning the audit Audit working papers Basic audit concepts internal control Elementary systems of internal control</p>
<p>Management Accounting 3 (40140603)</p> <p>Module 1 Explain, calculate, prepare and evaluate fixed and flexible operational and cash budgets Prepare budget reports reflecting actual against budget Discuss the use of budget reports to evaluate performance Explain the behavioural implications of planning and budgeting Explain the use of IT in the budget process Analyse, calculate and interpret operational variances Prepare reports using a range of benchmarks and evaluate the results Explain the behavioural implications of standard costing Explain, calculate, apply and compare different group incentive schemes Discuss and apply the use of advanced stock control methods Use activity based costing in cost determination</p>	<p>Internal Auditing 2 (040111022) Module 1 Evaluation of internal control system cycles Internal audit reports Internal auditor's relationship with other parties</p> <p>Internal Auditing 2 (040111022) Module 2 Statistical sampling Operational auditing Computer auditing</p> <p>Internal Auditing 3 (040111103) Module 1 Professional matters pertaining to internal auditing Audit working papers The internal audit process</p> <p>Internal Auditing 3 (040111103) Module 2 The audit approach of the cycles Computer auditing Fraud identification</p>

Management Accounting 3 (40140603)**Module 2**

Measuring relevant costs for decision-making
 Apply and evaluate short-term decision-making techniques
 Apply and discuss the experience and learning curve
 Apply and discuss the linear programming model
 Explain and apply the use of decision trees
 Explain and apply the use of network analysis and PERT analysis
 Explain the capital budgeting process
 Evaluate projects using investment appraisal techniques, including, under conditions of capital rationing
 Evaluate alternative investment appraisal techniques
 Explain the relevance of qualitative factors
 Prepare project cash flows that take account of taxations and inflation
 Evaluate mutually exclusive projects with unequal lives

Method of Evaluation:

Year Mark 40% and one 3-hour examination 60% = 100%

Programming I (PROG101)**Theory**

Problem-solving and structured programming techniques
 The visual aspects of VISUAL BASIC
 Control Structures (Sequence, Selection and Repetition)
 Sub-procedures and Function procedures
 Arrays
 Strings
 Graphics
 De-bugging
 Sequential File Processing

Practical:

Extensive use of problem solving and structured programming by solving problems using Visual Basic

Method of Evaluation:

One 3-hour examination 50% and Year Mark 50% = 100%

Software Skills I**Module 1 (SWSK111)**

Problem Solving & Structured Programming Techniques
 Programming Logic
 Control Structures (Sequence, Selection & Repetition)
 Introduction to VB .NET Console based

Practical:

Extensive use of problem solving VB .NET console applications.

Examination:

No exam —% course mark

Module 2 (SWSK121)

The “visual aspects” of Visual Basic .NET Windows
 Application
 Sub-procedures & Function procedures
 Arrays
 String Manipulation
 Sequential Files (if time allows)

Practical:

Extensive use of problem solving & structured programming by solving problems using VB.NET

Method of Evaluation:

No exam —% course mark

Taxation I (040100512)

Establish what taxable income is
 Determine and calculate the taxation of persons other than companies
 Apply the provisions relating to non-resident taxpayers
 Determine and calculate employees' tax and provisional tax
 Identify and value fringe benefits and allowances

Method of Evaluation:

Course mark - 40% and exam mark - 60% (one three hour exam)
