MISSION

- To empower Journalism graduates through quality career-focused Journalism teaching, learning and applied research.
- To build capacity in a transforming society within a dynamic African and global context.
- To promote sustainable partnerships with industry, community and society.
- To encourage entrepreneurial and vocational development through an innovative approach to analytic thinking and artistic expression.
- To instil in the learner initiative, sensitivity, responsibility and a values driven ethos.

VISION

DUT Journalism, a programme in the Department of Media, Language and Communication, strives to nurture a holistic approach towards journalism training and education as well as a critical understanding of society and world by balancing the intellectual, creative and artistic aspirations within the pragmatic requirements of the discipline.

What is a University of Technology?

A university of technology is characterised by being research informed rather than research driven where the focus is on strategic and applied research that can be translated into professional practice. Furthermore, research output is commercialised thus providing a source of income for the University. Learning programmes, in which the emphasis on technological capability is as important as cognitive skills, are developed around graduate profiles as defined by industry and the professions.
