

# When numbers – and making them work – are your passion

**A SCHOLARLY CULTURE:**  
A student enjoys DUT's quiet,  
well-resourced library.

THE Durban University of Technology's Faculty of Accounting and Informatics offers a range of accounting and finance-based programmes within its six departments:

- Auditing and Taxation
- Financial Accounting
- Finance and Information Management (Pietermaritzburg, Midlands)
- Information and Corporate Management (Library and Information Studies & Office Management and Technology)
- Information Technology
- Management Accounting

## ACCOUNTING

This programme is offered on both a full and part-time basis on the Durban Campus.  
It is also offered on a full-time

basis at the Riverside Site on the Midlands Campus.

## COST AND MANAGEMENT ACCOUNTING

The purpose of this qualification is to ensure competence in performing costing and accounting functions, assisting management accountants and small businesses. Activities are not necessarily at an advanced, complex and non-routine level.

### Career opportunities

Career opportunities exist in the accounting and related fields. Diplomates can enter the job market in the private/public sector as cost clerks, assistant financial/management accountants, budget officers, and finance officers.

### Location

Ritson Campus and Riverside Site, Midlands Campus

(Pietermaritzburg).

## FINANCIAL INFORMATION SYSTEMS

With financial systems in business being almost entirely automated, it is becoming increasingly necessary for financial professionals to be skilled in information technology. The financial information systems specialist is at the forefront in the design of information systems for financial decision making in business.

### Career opportunities

Programmer or a junior accountant, financial information systems specialist.

### Location

Ritson Campus

## INFORMATION TECHNOLOGY

A career in Information and Communication Technology (ICT) is a

career path of endless opportunities and diversity.

The National Diploma in Information Technology offers the opportunity to work in any industry, anywhere in the world. Careers in the ICT industry range from highly technical positions such as software or web developers to more business oriented positions such as business analysis.

The ICT environment is always changing, thus requiring constant updating of skills throughout one's career. Computer professionals often work under conditions of stress and urgency, so any student wishing to pursue this career path must have the character and perseverance to cope in such environments.

A basic skill that tends to categorise an ICT specialist is the

ability to think and express oneself logically; therefore students possessing these skills would be ideal candidates for this programme.

### Personal attributes

An aptitude for puzzles, a mathematical ability, a logical mind and accuracy characterise the successful student. If you possess most of these qualities, you should consider a career in Information and Communication Technology.

### Career opportunities

On completion of their studies, graduates will be able to apply for the following positions: programmer, junior analyst, programmer/analyst, junior database administrator, end user support, business analyst and many other related positions.

The training offered prepares the student for a job anywhere in the world, since internationally accepted software, textbooks, and training methods are used in our courses.

### Location

Ritson Campus
